- Drain Holes

Mouse – Back View

- On / Off Switch
- Battery Cover
- USB Receiver Storage

2

Plug & Play

After the batteries and the USB receiver are installed, the keyboard and mouse can be used. No software is needed!

Battery and Hardware Installation

Keyboard Battery Installation

- Open the battery cover on the back of the keyboard
- Insert the included AAA battery as the diagram on the battery tray indicates
- Close the battery cover

Mouse Battery Installation

- Open the battery cover on the bottom of the mouse
- Insert one, or two of the included AA batteries as the diagram on the battery tray indicates*
- Close the battery cover

USB Receiver Installation

- Plug the USB receiver into an available USB port on your computer
- Your Operating System will start to install the device driver automatically
- No additional software is needed. Enjoy your new keyboard and mouse!

* Weight Control Energy Management

The mouse can be used with one or two AA batteries. Users can adjust the mouse weight by inserting either one or two AA batteries. Using two batteries doubles the battery life to 1 year with normal use. Battery performance may vary depending on usage.

Customize Mouse DPI

The mouse is equipped with a customizable DPI switch. The default setting is 1500 DPI. Simply adjust the DPI sensitivity to your liking by pressing the +/- buttons on the mouse. Pressing the +/- buttons will adjust LED to Red, Green, or Orange.

Each color represents a different DPI value:

Red: 1000 DPI
Green: 1500 DPI
Orange: 2000 DPI

Federal Communications Commission (FCC) Notice

All other devices shall bear the following statement in a conspicuous location or device:
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

Caution:

“Changes or modifications not expressly approved by the part responsible for compliance could void the user’s authority to operate the equipment.”
