

◆ **Programmable Buttons**

For the side buttons, the default function is "forward" and "backward" For further functions, please download the MK950 mouse driver from below link, Under the mouse driver the side buttons and wheel could be self-defined the functions.

⚠ **Driver download link:**

◆ **High Resolution IR sensor**

The mouse is with high resolution IR sensor, the DPI could be up to 2000dpi It has precise location and strong capability of over boarder on different surfaces.

◆ **DIP Switch**

The mouse has 3 level dpi, 1000/1500/2000dpi for your freely choice, The factory default is 1000dpi, you could choose the DPI as you like by pressing the "dpi+" or "dpi-" button.

Technical Data

Keyboard		Mouse	
Keyboard size	467x185x30mm	Mouse size	120x75x39mm
Wireless	2.4G	Wireless	2.4G
Operating current	≤5mA	Operating current	≤8mA
working voltage	0.9~1.65V	working voltage	1.5V
Keycap stroke life	50 million cycles	Button lifecycle	10 million cycles
Range	10m	Range	10m
		Resolution	1000/1500/2000dpi

◆ **Cleaning for Keyboard**

1. Close the computer, disconnect the keyboard from the computer.

⚠ Pat the keyboard slightly, do not give too big pressure otherwise the inner part of the keyboard will be damaged.

⚠ Do not clean the inner part of the keyboard by water, otherwise the keyboard may be damaged.

CAUTION
RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS

2. Pull out keycaps, Using cotton ball and brush with detergent, clean the key caps and the dust and strain inside the keyboard. (suggest to buy keyboard super cleanx, which is more safe and convenient)

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference) and (2) this device must accept any interference) including interference that may cause undesired operation of the device

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage) et (2) l'utilisateur de l'appareil doit accepter tout brouillage radio électrique subi même si le brouillage est susceptible d'en compromettre le fonctionnement.

Complies with the Canadian ICES-003 Class B specifications. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.
