RE: FCC ID: QLN-DP2310P0001  
731 Confirmation #: EA298184  
Correspondence Reference #: 24319 & 24320:  
Vivato DP2310P0001 Professional Installation

Dear Mr. Dichoso,

This letter justifies the professional installation of devices relevant to the above mentioned application.

The DP2310P0001 will be professionally installed by personnel trained by Vivato, Inc. The DP2310P0001 will be shipped directly to the professional installer, rather than the customer. The FCC Part 15 requirements will be followed by the installers. The DP2310 Wi-Fi Switch System Description, Configuration and Installation Guide, Section 3.3.5, states the requirement for professional installation.

There are several reasons why professional installation is required. The design, size and the weight of the DP2310 Wi-Fi Switch requires mounting that cannot be performed properly without training. The directional pointing of the Vivato DP2310 Wi-Fi Switch requires knowledge of the vertical and horizontal angle characteristics of the antenna pattern, as well as knowledge of the desired and potential coverage area. These tasks are performed by experienced installers. The process the installers use to perform this work is not able to be implemented in an “out-of-the-box” written procedure for the Vivato DP2310 Wi-Fi Switch.

The Vivato DP2310 Wi-Fi Switch will not be distributed, marketed, and/or sold to the general public. The Vivato DP2310 Wi-Fi Switch will be sold through a Vivato-specified sales channel. Only Vivato Authorized Resellers will be able to purchase the product. All of the authorized resellers must complete technical training on the Wi-Fi Switches provided by Vivato.

Sincerely,

William J. Crilly Jr.  
Chief Technology Officer  
Vivato, Inc.
