ITC-5850-2 User Manual

Customer Information

1.This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On bottom of this equipment is a label that contains, among other information, a product identifier in the format **US: 6NYW400BITC5850 2**.If requested, this number must be provided to the telephone company.

2. An applicable certification jacks Universal Service Order Code(USOC) for the equipment is provided(i,e., RJ11C) in the packaging with each piece of approved terminal equipment.

3. A plug and jack used to connect this equipment to the premise wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connect to a compatible modular jack that is also compliant. See installation instructions for details.

4. The REN is used to determine the number of devices that may be connected to telephone line. Excessive RENs on a telephone line my result in the devices not ring in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five(5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. [For products approved after July 23,2001, the REN for this product is part of the product identifier that has the format **US: 6NYW400BITC5850 2**. The digits represented by ## are the REN without a decimal point(e.g., 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.]

5. If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

6. The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens, the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

7.Please follow instructions for repairing if any (e.g. battery replacement section); otherwise do not alternate or repair any parts of device except specified.

8. Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

9. Should you experience trouble with this equipment, please contact

Quick Reference Guide
- **Terminology**
    - Standby mode
      The mode your phone is in when you're not on a call. The phone is ready to accept a new action.

    - Talk mode
      The mode your phone is in when you're on a call. Some of the soft keys will not be available when in this mode.

    - TCID
      Talking Caller ID. Your phone will announce the caller's name when the

call comes in if you have caller ID service through your telephone company.

- o Call Waiting
  This service from your telephone company allows you to place a call on hold and pick up an incoming call on the same line.

- o Soft Keys
  Soft key appear on the LCD screen of the base or handsets direcly below the LCD. The functions of these change based on the mode (standby or talk) or menu.

- **Parts Checklist**
  1. This user's guide
  2. Base unit
  3. 2 Handsets
  4. 2 NiCad battery packs
  5. Charging stand
  6. Power adapter
  7. Telephone line cords
  8. Belt clip

- **LCD Display**

The LCD on the handset and base unit, combined with the soft keys and navigation keys are used to select the various features and functions of the phone.

- o Soft Key Functions
  The soft key functions appear on the LCD screen of the base or handsets. The functions change based on the mode (standby or talk) or menu. The function of the soft key is determined by the text directly above the button.

- o Standby Mode
  Standby mode is the phone's default mode. In standby mode the LCD of the base displays the new and total call counter for caller ID, new message counter, current day and time, and three soft keys.
```
12:OOAM 12/23
        New CID : 5

MENU            REDIAL        V-MAIL
```
[Base]

In standby mode, the LCD of the handset displays the new call counter for caller ID, current day and time, handset number, and three soft keys.

```
12:OOAM  12/12
        Handset  #2
      New CID: 5

MENU            REDIAL        V-MAIL
```
[Handset]

Pressing a key on the base or handset in standby mode will generate a key tone.

NOTE: If the battery in the handset is low while in standby mode, the handset will also display the low battery icon in the LCD.
- o

Getting Started
- • **Setting up your phone**
  - o **Locating your phone**
  - o **DIAGRAM**-room illustration
    Decide where you would like to place the base and the charging stand. Choose a central location away from televisions, microwaves and other electronic appliances that could cause interference.

  - o **Connecting your phone**

- Power connection
  Connect the power cord to a standard electrical outlet that is not controlled by a wall switch.

- Phone line connection
  Plug one end of the telephone line cord into the jack on the back of the base. Plug the other end into a modular telephone wall jack.

- **Battery installation**

  1. Remove the battery compartment cover on the handset.
  2. Inset the battery into the battery compartment.
  3. Plug the battery connector into the receptical in the battery compartment.
  4. Replace the cover.
  5. Repeat steps 1 through 3 for the second handset.

- **Belt clip (optional)**
  You can use the phone with or without the belt clip. To attach it, slide the belt clip down on the back of the handset until it snaps into place. To remove it, slide the belt clip up.

- **Charging your phone**
  1. Place one handset in the base.
  2. Plug the AC adapter from the base unit into the wall.
  3. Place the other handset in the charging stand.
  4. Plug the AC adapter from the charging stand into the wall.

  IMPORTANT: Allow the handsets to charge for at least 12 hours before using the phone for the first time. The fully charged phone should offer 5 hours of continuous talk time.

  The phone charges itself automatically while the handset is placed in the base.

  When the battery is low, the phone will emit a low battery tone and a low battery icon will be shown in the LCD.

- **Wall mounting the base unit**
  The base unit can be used on a desk or mounted on a wall. Make sure that the AC adapter and telephone line jack are **not** plugged in while mounting the phone.
  1. Turn over the base.
  2. Run the telephone line jack and power cord through the opening.
  3. Connect the telephone line cord to the jack on the base.
  4. Connect the AC adapter to the jack on the base.
  5. Mount the base on the wall by aligning the holes on the base with the mounting studs on the wall jack.

Menu Setting Options
Your phone is set to default settings at the factory that match the way that most people use their phone. While you may never need to change many of

these options, there are a few options that need to be set in order for you to be able to take full advantage of your phones functions.

- **Local and Global Settings**
  When you set some options (like time and date) they are automatically set globally on all phones in your set. Other options (like ringer volume) are specific to the individual phones and therefore need to be set locally on all phones in your set.

To access these settings press the MENU soft key on either the handset or base station and use the up/down arrow keys.
- **Ringer level (local setting)**
  Ringer levels can be changed from the base unit or the handset.
  1. Press the [Menu] soft key.
  2. Select the **Handset Setup** menu or the **Base Setup** menu.
  3. Select the **Ringer Level** sub menu. The LCD will show "**Ringer Level**".
  4. Press the [OK] soft key.
  5. Press the [UP] or [DOWN] soft key to choose *High*, *Medium*, *Low* or *Off*
  6. Press the [OK] soft key.

```
┌─────────────────────────────┐
│ 12:00 AM 12/23              │
│ High                        │
│ Medium                      │
│ Low                         │
│  BACK                       │
└─────────────────────────────┘
```

When *Off* is selected from the **Ringer Level** sub menu, the LCD appears as below:

```
┌─────────────────────────────┐
│ 12:00 AM 12/23       🔇     │
│                             │
│       New CID:  5           │
│                             │
│  MENU          REDIAL       │
└─────────────────────────────┘
```

- **Ringer melody (local setting)**
  The ringer melody sets which ringer you hear when you receive a call. You can change the ringer melody from the **Handset Setup** or **Base Setup** menu.
  1. Press the [Menu] soft key.
  2. Select the **Handset Setup** menu or the **Base Setup** menu.
  3. Select the **Ring Melody** sub menu. The LCD will show "**Ring Melody**".
  4. Press the [OK] soft key.

5. Press the [UP] or [DOWN] soft key to choose *Ring Tone #1*, *Ring Tone #2*, *Ring Tone #3*, *Ring Melody #1*, *Ring Melody #2*, *Ring Melody #3*, *Ring Melody #4.*
6. Press the [OK] soft key.

The Ring Tone or Ring Melody you selected will play briefly.

```
12:00 AM 12/23
Ring Tone      #1
Ring Tone      #2
Ring Tone      #3
BACK
```
- **One Touch Voice Mail Access (local setting)**
  If you subscribe to your telephone company's voice mail service, you can use the built-in features on your phone to receive notification of messages and to pick up your messages.

  o Entering access code
    For easy access to your voice messages, your voice mail access number can be stored from the base or the handset.
    1. Press the [Menu] soft key.
    2. Select the **Handset Setup** menu or the **Base Setup** menu.
    3. Select the **Voice Mail** sub menu. The LCD will show "**Voice Mail**".
    4. Enter your personal access number using the keypad. You can also use the [DELETE] or [PAUSE] soft key, if needed (20 digit maximum).
    5. Press the [OK] soft key.
    To delete the current voice mail access number, delete the number showing under the **Voice Mail** sub menu (step 4) using the [DELETE] soft key.

```
12:00 AM 12/23
123455

PAUSE            DELETE
OK
```
  o Retrieving your Voice Mail messages
   If you have messages (signified by a blinking red light on the handset/ base unit and/or hear a stutter dial tone) simply press the MSG soft key and your stored access number will be automatically dialed.

    Note: After retrieving your Voice Mail messages the flashing red light should stop. If it does not, you may manually turn off the light by following the Message Waiting Lamp Setting instructions on page ___.

- o Tone setting
  You can receive a audio notification of messages that are waiting. ***On*** is the default mode.
   1. Press the [Menu] soft key.
    2. Select the **Handset Setup** menu or the **Base Setup** menu.
    3. Select the **Voice Mail Tone** sub menu. The LCD will show "**Voice Mail Tone**".
    4. Press the [OK] soft key.
    5. Press the [UP] or [DOWN] soft key to choose ***On*** or ***Off.***
    6. Press the [OK] soft key.

```
12:00 AM 12/23
On
Off

 BACK
```
- **Time/Date setting (global setting)**
  Your phone can display the current date and time on both the handset and the base.
    1. Press the [Menu] soft key.
    2. Select the **Handset Setup** menu or the **Base Setup** menu.
    3. Select the **Time Set** sub menu. The LCD will show "**12:00 AM, 01/01**" if this is the first time you are setting the date and time.
    4. Press the [OK] soft key.
    5. Press the number keypad (0 to 9) to enter an Hour. Press the [OK] soft key.
    6. Press the number keypad (0 to 9) to enter a Minute. Press the [OK] soft key.
    7. Press the [AM/PM] soft key to choose AM or PM. Press the [OK] soft key.
    8. Press the [UP] or [DOWN] soft key to select the Day. Press the [OK] soft key.

```

```

- **Message waiting lamp setting (global setting)**
  If you receive subscriber trunk dialing (STD) or frequency-shift keying (FSK) data and have turned on the "Voice mail" indicator, the LED can flash on the handset when a message is waiting. *Off* is the default mode. You can turn this on through the **Msg Waiting** sub menu on the base or the handset.
   1. Press the [Menu] soft key.
    2. Select the **Handset Setup** menu or the **Base Setup** menu.
    3. Select the **Msg Waiting** sub menu. The LCD will show "**Message Waiting, On**"
    4. Press the [OK] soft key.
    5. Press [UP] or [DOWN] soft key to choose *Off*.
    6. Press the [OK] soft key.

```
  5. Press the [UP] or [DOWN] soft key to choose **On** or **Off**.
  6. Press the [OK] soft key.

Telephone Operation
- **Making and receiving calls**
  o Dialing calls
    - Standby mode dialing
      You can make calls in standby mode from the handset or the base.
      1. Dial the number on the handset or base. The number will appear on the LCD.

2. Press the [TALK] button on the handset or the [SPEAKER] button on the base.

- Talk mode dialing
  You can make calls in talk mode from the handset or the base.
  1. Press the [TALK] button on the handset or the [SPEAKER] button on the base.
     "**Talk**" will appear on the LCD.
  2. Dial the number. The number will appear on the LCD.

- Redialing a call
  Your phone stores the last 3 numbers that were dialed. In "Standby Mode" Press the [REDIAL] soft key. The LCD will show the most recent number dialed.
  1. Press the [UP] or [DOWN] soft key to find the number you want to redial.
  2. Press the [TALK] button to dial the number.

- Storing a redialed call
  You can store recently dialed numbers to the Phonebook.
  1. Press the [REDIAL] soft key. The LCD will show the most recent number dialed.
  2. Press the [UP] or [DOWN] soft key to find the number you want to store.
  3. Press the [STORE] soft key. The LCD will show "**Edit Name**".
  4. Use the keypad (1 through 9) to edit the name.
  5. Press the [OK] soft key. The LCD will show "**Edit Number**".
  6. Use the keypad (0 through 9) to edit the number.
  7. Press the [OK] soft key. The LCD will show "**Done!**".

- Erasing a redialed call
  Numbers can also be deleted from the redial memory.
  1. Press the [REDIAL] soft key. The LCD will show the most recent number dialed.
  2. Press the [UP] or [DOWN] soft key to find the number you want to erase.
  3. Press the [DELETE] soft key. The LCD will show "**Delete Redial**".
  4. Select *Yes*.
  5. Press the [OK] soft key. The LCD will show "**Deleted!**".

o Answering calls
  - Handset/Base
    NOTE: The base displays "**Incoming Call**" after the first ring. The phones display caller ID information after the second ring.

```
12:00AM  12/12
 Incoming Call
```

NOTE: If no answer is received in 1 minute, the page will be terminated.

- **Call Waiting**
  If you subscribe to call waiting service with your telephone company, you can answer a new incoming call without disconnecting from your original call. While in talk mode, your phone will emit a beeping sound to let you know another call is coming in. If you subscribe to Call Waiting Caller ID service, the handset will display the name and number of the party calling. To answer a call waiting call, do the following.

    1. Press the [FLASH] button to put your original call on hold and connect to the incoming call.
    2. Press the [FLASH] button again to return to the original call.

- **Caller ID**
  If you subscribe to caller ID service with your telephone company, you can hear and see caller ID information for incoming calls.
   - Talking
   Your phone will announce incoming calls after the second ring.

      Your handset and base unit will announce the displayed name, e.g. "**Call from SMITH JOHN**" following every ring. They will continue to announce the caller's name repeatedly until the call is answered.

    - Display

    The handset displays "**Incoming Call**" at the first ring.

    ```
    1:08PM 1/17

    Incoming Call

    MUTE
    ```

    After the second ring, the handset will display the caller ID information.

    ```
    1:08PM 1/17

    SMITH JOHN
    345-224-2456
    ```

    Following every ring, the handset and base unit will announce the displayed name
    "**Call from SMITH JOHN**"

    The handset and base unit will announce the caller's name repeatedly until the call is answered. After you answer the call, the display will show the length of the call.

- **Hands-free speakerphone**
  You can talk on the handset and base hands free by using the speakerphone function.
  1. Press the [SPEAKER] button on the handset or base.
  2. Dial the number you would like to call.

  Note: You can also dial the number first and then press the [SPEAKER] button. You may also answer an incoming call by pressing the speakerphone button.

- **Volume adjustment**

 1. Press the [UP] or [DOWN] button to change the volume while in speakerphone talk mode.

  Volume status will be displayed on the LCD for 3 seconds. After 3 seconds, talk status will be displayed on the LCD again.

Phonebook
Your phone is features with a phone book that has the capacity to store up to 40 different name and number entries. The phonebook feature allows you to copy entries from one handset to another or from the base to the handsets without manually having to re-enter names and numbers.

- **Storing new entries**

  1. Press the [PHONEBOOK] soft key.

  ```
  1:08PM 1/17

    2. Press the [UP] or [DOWN] button.

The Phonebook list will scroll from the first to the last entry when you press the [UP] button and from last to first when you press the [DOWN] button.

- **Copying entries to another handset**
  You can transfer stored phonebook entries from handset to handset, from base to handset or from handset to base without having to manually re-enter names and numbers. You can transfer one entry at a time or all entries at once.

    To copy all memories

    1. In standby mode, press the [PHONEBOOK] soft key.
   2. Press the [COPY] soft key.

```
1:08PM 1/17
Which unit?
Handset       #2

Base
```

3. Press the [UP] or [DOWN] button to select where you want to transfer the phonebook entries (handset or base).
4. Press the [OK] soft key.

```
1:08PM 1/17
Copy Phonebook
One Memory

All Memories:  21
```

5. From the **Copy Phonebook** menu, select *All Memories*. The LCD will show "**Are you sure?**".
6. Press the [UP] or [DOWN] button to select *Yes*.
7. Press the [OK] soft key.

```
1:08PM 1/17
Are you sure?
Yes
No
BACK
```

To select one memory
1. In standby mode, press the [PHONEBOOK] soft key.
2. Press the [COPY] soft key.

```
1:08PM 1/17
Which unit?
Handset        #2

Base
```

3. Press the [UP] or [DOWN] button to select where you want to transfer the phonebook entries (handset or base).
4. Press the [OK] soft key.

```
1:08PM 1/17
Copy Phonebook
One Memory

All Memories:  21
```

5. From the **Copy Phonebook** menu, select *One Memory*.
   The LCD will show "**Are you sure?**".
6. Press the [UP] or [DOWN] button to select *Yes*.
7. Press the [OK] soft key.

While the Phonebook memory is being transferred, the display will show "**Copying**" with the handset name or number or the base.

```
1:08PM 1/17
Copying ▶
Handset  #2
                  11/21
       CANCEL
```
When the transfer is completed, the display will show "**Done!**" for one second.

```
1:08PM 1/17
 Done!

```

- **Calling an entry**

  Making a Call from Standby Mode.
  1. Press the [PHONEBOOK] soft key.
  2. Press the [UP] or [DOWN] button until you find the entry you want to dial.
  3. Press the [TALK] or [SPEAKER] button on the handset or the [SPEAKER] button on the base. The displayed number is dialed.
  4. To hang up, press the [END] button on the handset or the [SPEAKER] button on the base.

```

Caller ID (CID)
- **Caller ID display**
  - Caller ID call waiting
    Your phone is compatible with caller ID and call waiting if you have subscribed to that service through your telephone company.

  - Viewing the CID list

Caller ID information only can be reviewed in standby mode. The display max time out is 1 minute.

When the caller ID is displayed on the LCD, if the number has less than 14 digits, the number will be displayed with the dashes (-) on the LCD. If the number has more than 13 digits, the number will be displayed without the dashes (-) on the LCD.

A name is displayed from left side and a number is displayed from left side on the LCD. Caller ID is displayed up to 15 characters for name and up to 15 digits for number.

When a user reviews caller ID, it displays day and time, caller ID index, name and number on the LCD.

The handset and base have [BACK], [DELETE], and [STORE] soft keys. When a user reviews caller ID, the LCD displays "OUT OF AREA", "BLOCKED CALL", "UNKNOWN CALLER" on the LCD. The LCD displays "LONG DISTANCE" for long distance call.

1. Press the [UP] or [DOWN] button to review caller ID information in standby mode. The LCD will display all information from the Caller ID list.

Troubleshooting

Problem	Solution
If the phone does not work, check all of the following:	• Make sure the batteries are installed properly in the handset • Make sure the AC adapter is plugged into the wall and that the outlet controlled by a wall switch • Make sure the telephone line cord is plugged into the phone and into • Check if the LCD screen shows "**Low Battery**"
If you hear static on the line:	• Move closer to the base • Move away from household appliances such as microwaves, computer televisions. • Check whether a household appliance is plugged into the same outlet Try moving the base to a different outlet.
If you cannot hear the phone ringing when a call comes in:	• Check that the ringer is turned on • Make sure the AC adapter is plugged into the wall and that the outlet controlled by a wall switch • Make sure the telephone line cord is plugged into the phone and into • Move closer to the base
If caller ID information does not appear when a call comes in:	• Make sure that you have caller ID service through your telephone cor • Make sure the battery is charged • The handset displays caller ID information for only 10 seconds after t • "**NO DATA**" will be displayed on the LCD for 10 seconds after the initi handset doesn't receive caller ID signal until 2nd ring start
If the Talking Caller ID (Talking CID) is not working:	• Wait until the second ring; depending on radio communication with th the handset may not display Caller ID information immediately after t • The call may be from an area where name display service is not availa • Make sure the ringer volume of the handset and the base unit is turne • Caller's names will not be announced if an outside call is received whi intercom call between the handset and base unit • Check whether you have Type 2.0 caller ID; the caller's information w displayed, but not announced. • Caller ID supports names of up to 15 letters. If the caller's name has 15 letters, the name will not be displayed or announced correctly. If the unit does not receive Caller ID information, one of the following will displayed:

Display	Meaning
Out of area	The caller dialed from an area which does not provi service.
Private	The caller requested not to send his/her information
Long distance	The caller made a long distance call.

Battery low operation.

If the handset battery is low, a battery low icon and "**Low Battery**" will appear on the LCD. The handset should generate low beep in standby mode. The handset also will generate a low beep every 30 seconds in talk mode.

Handset Voltage	3.8Vdc ±0.025Vdc
Size	
Memory	80 Caller ID memory per handset, 40 phone book memory shared between handsets

Precautions

1. Read and understand all instructions in the user's guide. Observe all markings on the product.
2. Avoid using the telephone during a thunderstorm.
3. Do not use the telephone in the vicinity of a gas leak.
4. Do not use this product near water.
5. If this phone does not operate normally, read the "Troubleshooting" section in the user's guide.
6. Replace batteries only as describe in the user's guide.

Warranty

One Year Limited Warranty

Important: Evidence of original purchase is required for warranty service.

ELEMENTS OF WARRANTY: IntelliTouch warrants, for one year, to the original owner, this IntelliTouch Product to be free from defects in material and craftsmanship with only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect 12 months after the date of original sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by IntelliTouch, (C) improperly installed, (D) serviced or repaired by someone other than an authorized IntelliTouch service center for a defect or malfunction covered by this warranty, (E) used in conjunction with equipment or parts or as part of any system not manufactured by IntelliTouch, or (F) installed or programmed by anyone other than as detailed by the owner's manual for this product.

STATEMENT OF REMEDY: In the event that the products does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit without charge for parts, service or any other costs (except shipping and handling) incurred by the warrantor or its

representatives in connection with the performance of this warranty. Warrantor, at its option, may replace the unit with a new or refurbished unit.

THE LIMITED WARRANTY SET FORTH ABOVE IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation may not apply to you.
LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside of the United States of America and Canada.
PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in the owner's manual you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). The Product should include all parts and accessories originally packaged with the Product. Include evidence of original purchase and a note describing the defect that has caused you to return it. The Product should be shipped freight prepaid, by traceable means, to warrantor at:

IntelliTouch

FCC Information

Your telephone equipment is registered with the Federal Communications Commission and is in compliance with parts 15 and 68, FCC Rules and Regulations.

1. Notification to the Local Telephone Company On the bottom of this equipment is a label indicating, among other information, the FCC Registration number and Ringer Equivalence Number (REN) for the equipment. You must, upon request, provide this information to your telephone company. The REN is useful in determining the number of devices you may connect to your telephone line and still have all of these devices ring when your telephone number is called. In most (but not all) areas, the sum of the RENs of all devices connected to one line should not exceed 5. To be certain of the number of devices you may connect to your line as determined by the REN, you should contact your local telephone company.

Notes

• This equipment may not be used on coin service provided by the telephone company.

• Party lines are subject to state tariffs, and therefore, you may not be able to use your own telephone equipment if you are on a party line. Check with your local telephone company.

• Notice must be given to the telephone company upon permanent disconnection of your telephone from your line.

2. Rights of the Telephone Company Should your equipment cause trouble on your line that may harm the telephone network, the telephone company shall, where practicable, notify you that temporary discontinuance of service may be required. Where prior notice is not applicable and the circumstances warrant such action, the telephone company may temporarily discontinue service immediately. In case of such temporary discontinuance, the telephone company must: (1) promptly notify you of such temporary discontinuance; (2) afford you the opportunity to correct the situation; and (3) inform you of your right to bring a complaint to the Commission pursuant to procedures set forth in Subpart E of Part 68, FCC Rules and Regulations. The telephone company may make changes in its communications facilities, equipment, operations of procedures where such action is required in the operation of its business and in compliance with FCC Rules and Regulations. If these changes are expected to affect the use or performance of your telephone equipment, the telephone company must give you adequate notice, in writing, to allow you to maintain uninterrupted service.

Interference Information This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference; and (2) This device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna (that is, the antenna for radio or television that is "receiving" the interference).

• Reorient or relocate and increase the separation between the telecommunications equipment and receiving antenna.

• Connect the telecommunications equipment into an outlet on a circuit different from that to which the receiving antenna is connected. If these measures do not eliminate the interference, please consult your dealer or an experienced radio/ television technician for additional suggestions.

Hearing Aid Compatibility
This telephone system meets FCC standards for Hearing Aid Compatibility.
