RE: FCC ID: QMNRH-66\_ATCB002081

Attention: Clayton Bennett

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the SAR report give the power of the device in Conducted antenna terminal power while the EMC report only reports power in ERP and EIRP. Please note that for proper comparison SAR and EMC powers must be of the same type. Please either record the conducted power measured during the EMC test in the EMC report or please report the ERP power measured during the SAR test in the SAR report. Please make sure that if conducted power is used in both that they are within 5% as required by the FCC.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
