Re: FCC ID: QMNRH-66
Applicant: Nokia Inc.

REQUEST FOR UPDATE OF CLASS II PC

Nokia filed Class II Permissive Change for FCC ID QMNRH-66 in August and obtained Grant on 08/20/2005. The filing involved a change of VCTCXO. Even though this change is not expected to change SAR performance, SAR was measured during the evaluation, but due to an oversight the SAR report was not included in the filing. The SAR result variation between older filings and the latest one is inside measurement uncertainty, but we would like to file the latest SAR report because some of the SAR values are a shade higher than earlier.
