Hello Chris,

I sent the email last friday. Please find the following.

Your prompt response would be much appreciated.

Thank you.

Best Regards,

Sun- Hee KIM

Subject: Nokia Inc., FCC ID: QMNRM-214, Assessment NO.: AN06T5641, Notice#1

Dear Ki Soo Kim:

I have reviewed the above referenced TCB application and find that the following items need to be addressed before the review can be continued:

1. The Parts-List/Tune-up procedure listed in the Confidentiality letter and test report is just a Parts list, with no tune-up procedure information. Please provide a Tune-up procedure exhibit for this application.

==> Please find the attachment file. <file name : Turn-up procedure (Nokia 6215i)>

2. The SAR Validation plots for PCS1900 are dated February 16th and the SAR test plots show test date of February 17th, 2006. Please verify that the test was performed within 24 hours of the validation.

==> Please find the attachment file. <file name : ATT. Q (DIPOLE VALIDATION PLOTS)-new>

3. The SAR test report states that the sample of this handset tested is a prototype. Please verify that this

is an 'identical prototype', meaning that it is identical to the production version of this handset.

==> It is identical to the production version of this handset.

4. The SAR test photos show that the holster/clip used for the body-worn testing appears to contain a metallic spring. The Body-Worn statements in the Users Manual state that the holster/clips should contain no metallic components (2 places). Please correct this discrepancy by either revising the Users Manual statement to indicate that only the clips used for testing should be used with this device or by providing additional SAR compliance with a 2.0cm air-gap (or other non-metallic 2.0cm spacing accessory).

==> Please find the attachment file. <file name : ATT. M (Manual)-new>

Please note that since this handset uses CDMA2000 modulation, I am communicating with the FCC to ensure that their current policies are met within the application. Further information may be requested if the FCC Policies have changed recently.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Chris Harvey

Dear KH Park, the review of the application has been performed and I have requested additional clarifications per the attached e-mail. I am now awaiting a response from HCT.

Please contact me if you have any further questions.

Best regards,

Chris Harvey
