CHANGES IN DESIGN – PERMISSIVE CHANGE CLASS 2

Pursuant to Section 2.1043 of the Commission's Rules, the Applicant hereby requests approval for changes in design for product FCC ID: QMNRM-375.

Changes have been made to mechanical components to improve product durability & reliability. New plastic covers with a different color and composition were also evaluated. An internal decision was made to repeat the following measurements:

SAR: 2.1093

HAC: 20.19

Radiated RF Power: 22.913, 24.232(b), 27.50(d)(2)

Radiated Spurious Emissions: 2.1053, 22.917(e), 24.238(a), 27.53(g)

Conducted RF Power: 2.1046

Testing found that some values of SAR changed slightly from the initial grant. As overall body and head SAR values did not increase, it was decided not to modify the User Manual.
