RE: FCC ID: QMNRM-430_ATCB006435
Attention:

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that when reporting EIRP the data must show the formula used to determine EIRP and the data must show how this formula was used. While the test report shows the formula used to determine the final result the test report only shows the final result. Please provide a test report which provides the measurement data as required by the FCC. You can refer to a typical Nokia test report for examples.
2. Please note the same issue exists with radiated spurious emissions as stated in item 1. Please provide a test report which provides the measurement data as required by the FCC and as properly done in accordance with TIA603. You can refer to a typical Nokia test report for examples.
3. Please note that licensed devices are to be tested in accordance with TIA603 as applicable. Please also note that test reports are to state which FCC accepted test procedures were used. Please note that the provided test report for part 24 does not state what test method was used. Please retest as necessary to include proper mention and testing in accordance with TIA603C.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Except as described in §0.459, correspondence and responses should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
