portable device

n.a.

Transceiver 1 and 2 are DTS devices, tested conform part 15.247. They will be used in a car as transceiver system. That is why they have one FCC ID only.

The receiver portions of both transceivers follow part 15.101 (b)...However, receivers indicated as being subject to Declaration of Conformity that are contained within a transceiver, the transmitter portion of which is subject to certification, shall be authorized under the verification procedure....

**There gives no additional device as receiver only in this T91 NA system.**

Thank you.

kind regards
