Subject: Disabled 802.11b/g/n functionality

WE, **Harman International** (39001 West Twelve Mile Road, Farmington Hills, MI 48331, USA) confirm that 802.11b/g/n functionality is disabled for our

TYPE: CMC
MODEL: VP3 330 NA
FCC ID: QNG-BE2803
IC: 6434C-BE2803

and is not available to the user using any of the following methods.

1. Software restrictions limit functionality to the integrated Bluetooth radio operating in frequency band 2402-2480 MHz.
2. Firmware installed from the factory does not permit 802.11b/g/n functionality.
3. The user interface does not allow selection of 802.11b/g/n functionality.
4. There is no direct access to the module that could inadvertently permit access and modification to existing firmware, etc.

Best Regards,
