PLA RF REMOTE & RECEIVER KITS

CONVENIENT DLA RF CONTROL

An industry first for speaker selectors, the DLA RF Remote & Receiver Kit allows you to enjoy all the benefits of ATON's innovative DLA selector from one simple RF remote control. Now you can control audio in each room with volume, mute, all on/off and unique "sound scene"* commands from anywhere, inside or outside the home (up to 200 feet away). The DLA RF Remote is perfect for outdoor applications where wireless control is essential.

ONE TOUCH, MULTIPLE POSSIBILITIES

The DLA remote's "scene" button is ideal for parties and entertainment—with the touch of a button all rooms come on to their pre-programmed volume levels. The "all on" button is a quick and easy way to turn all rooms on to their default or last volume levels. And the "all off" button turns off all rooms when it's time for bed or time to leave. Available in 2/4/6 room configurations, each remote includes room labels for easy room indentification.

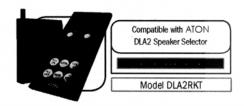

ABOUT DLA TECHNOLOGY* (DYNAMIC LEVEL ADJUSTMENT)

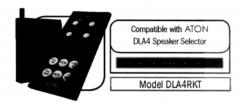

Unlike typical speaker selectors that use basic impedance correction, the ATON DLA Speaker Selectors utilize a logic circuit that actively monitors how many rooms are on, along with their respective volume levels, and delivers maximum available power to each room – simultaneously protecting the DLA and the amplifier from damage.

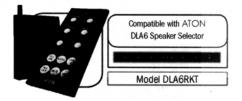

THE END RESULT

The DLA Speaker Selector allows you to enhance your environment with rich audio in multiple locations. You can enjoy the freedom of letting the party be vibrant while keeping the kitchen conversational. And with convenient RF control, ATON lets you relax so that you can finally sit back...and listen.

*Patent pending

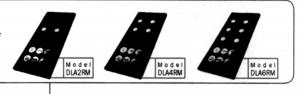

ADDITIONAL RF REMOTE MODELS

Single remotes are also available for you to program to your existing remote receiver. With additional RF remotes always in reach, you can easily control the audio of each room from any room.

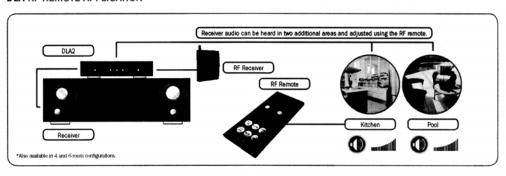

DLA RF REMOTE FEATURES

- "All On" button turns audio on in all rooms
- "All Off" button turns audio off in all rooms
- "Scene" button allows for one-touch recall of your favorite system settings
- "Vol +", "Vol -" and "Mute" buttons allow for volume and mute control in selected rooms
- Up to 200 ft. range (through walls, ceilings and floors)

- Up to seven ATON RF Remotes can be programmed to a single RF Receiver
- RF Remotes will only control the RF Receiver they are programmed to
- RF Receiver easily connects to DLA Selectors using a simple RJ-11 plug

Model DLA4 Model DLA6

INNOVATIVE SPEAKER SELECTION

The speaker selector concept has been around for decades as a device that enables you to connect multiple speakers throughout the home to your stereo system, and turn the speakers on or off. A good concept, but it requires you to either walk to the selector each time you want to control the audio or use clunky volume controls at each speaker location. Not anymore! Introducing the ATON DLA Speaker Selector - the most exciting advancement in the history of speaker selector products.

ABOUT DLA TECHNOLOGY* (DYNAMIC LEVEL ADJUSTMENT)

Unlike typical speaker selectors that use basic impedance correction, the ATON DLA Selector utilizes a logic circuit that actively monitors how many rooms are on, along with their respective volume levels, and delivers maximum available power to each room - simultaneously protecting the DLA and the amplifier from damage. Each DLA room output features an electronically controlled potentiometer, built with the highest-grade materials available to ensure super-flat frequency response and high power handling (125 W).

RF AND IR CONTROL OPTIONS

Electronic controls on the front of the DLA provide true ease of use of all system functions. But what puts DLA selectors in a class of their own are the additional RF and IR control options (see below). Using the industry's first RF remote for a speaker selector, you can adjust audio in each room with volume, mute, all on/off and unique "sound scene"† commands from anywhere inside or outside the home (up to 200 feet away). And utilizing in-room IR receivers or touchpads you can control the DLA as well as all connected audio sources such as CD players and radio tuners.

PLUG AND PLAY

The DLA easily connects to your home theater/stereo receiver and multiple pairs of wired speakers throughout the home. If you already have a basic speaker selector, the DLA quickly replaces your existing selector and allows you to play and control your favorite music like never before.

THE END RESULT

The DLA Speaker Selector allows you to enhance your environment with rich audio in multiple locations. You can enjoy the freedom of letting the party be vibrant while keeping the kitchen conversational. And with convenient RF control, ATON lets you relax so that you can finally sit back...and listen.

"A "Sound Scene" is a programmable preset that allows you to create and recall your favorite volume settings for each room with the press of a button.

OPTIONAL CONTROL ACCESSORIES

RF Remote & Receiver Kit

Tabletop IR Receive AIR5

Surface-Mount R Receiver AIR1b

In-Wall Touchpad

The front panel of the DLA unit can also be used to control the audio. *Available first quarter, 2008.

DLA FEATURES

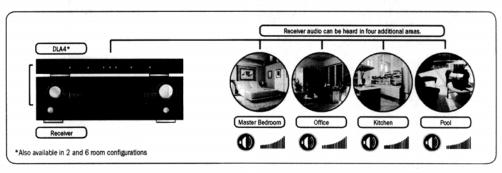

- DLA (Dynamic Level Adjustment) technology delivers maximum available volume levels to each room while protecting your amplifier from damage (patent pending)
- Advanced Control Options (sold separately)
 - ATON RF Remote (Up to 200 ft. Range)
 - ATON IR Receivers
 - ATON In-Wall Touch Pad
- Adds multiple pairs of speakers to your home theater/stereo receiver or amplifier
- Expands Multi-Zone audio system capabilities with additional speaker and control locations (sub-zones)
- Programmable "Scene" command for one-touch recall of your favorite system settings
- One-touch "All On" command turns audio on in all rooms
- One-touch "All Off" command turns audio off in all rooms
- Room labels with adhesive backing included for easy front panel room identification
- 2 Year Limited Warranty
- Slimline Infrared (IR) Remote Inlcuded

Model DLA2RF

INNOVATIVE SPEAKER SELECTION

The speaker selector concept has been around for decades as a device that enables you to connect multiple speakers throughout the home to your stereo system, and turn the speakers on or off. A good concept, but it requires you to either walk to the selector each time you want to control the audio or use clunky volume controls at each speaker location. Not anymore! Introducing the most exciting advancement in the history of speaker selector products: The ATONTM DLA 2 Room Speaker Selector (DLA2RF).

ABOUT DLA TECHNOLOGY* (DYNAMIC LEVEL ADJUSTMENT)

Unlike typical speaker selectors that use basic impedance correction, the ATON DLA utilizes a logic circuit that actively monitors how many rooms are on, along with their respective volume levels, and delivers maximum available power to each room - simultaneously protecting the DLA and the amplifier from damage. Each DLA room output features an electronically controlled potentiometer, built with the highest-grade materials available to ensure super-flat frequency response and high power handling (125 W).

RF REMOTE CONTROL

Electronic controls on the front of the DLA2RF provide true ease of use of all system functions. But what puts the DLA2RF in a class of its own is RF remote control. Using the industry's first RF remote for a speaker selector, you can adjust audio in each room with volume, mute, all on/off and unique "sound scene" tommands from anywhere inside or outside the home (up to 200 feet away).

PLUG AND PLAY

The DLA2RF easily connects to your home theater/stereo receiver and up to two pairs of wired speakers throughout the home. If you already have a basic speaker selector, the DLA quickly replaces your existing selector and allows you to play and control your favorite music like never before.

THE END RESULT

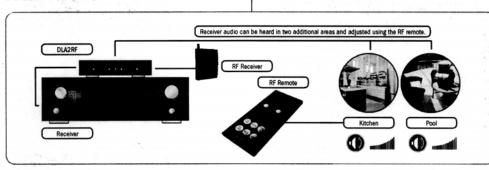

The ATON DLA2RF allows you to enhance your environment with rich audio in multiple locations. You can enjoy the freedom of letting the party be vibrant while keeping the kitchen conversational. And with convenient RF control, ATON lets you relax so that you can finally sit back...and listen.

¹A "Sound Scene" is a programmable preset that allows you to create and recall your favorite volume settings for each room with the press of a button.

DLA2RF APPLICATION

DLA2RF FEATURES

- DLA (Dynamic Level Adjustment) technology delivers maximum available volume levels to each room while protecting your amplifier from damage (patent pending)
- ATON RF remote (included) controls volume levels independently for each room from inside or outside your home (Up to 200 ft. Range)
- Adds up to 2 pairs of speakers to your home theater/stereo receiver or amplifier
- Programmable "Scene" command for one-touch recall of your favorite system settings
- DLA2RF RF REMOTE FEATURES
- "All On" button turns audio on in all rooms
- "All Off" button turns audio off in all rooms
- "Scene" button allows for one-touch recall of your favorite system settings
- "Vol +", "Vol -" and "Mute" buttons allow for volume and mute control in selected rooms
- Up to 200 ft. range (through walls, ceilings and floors)

- One-touch "All On" command turns audio on in all rooms
- One-touch "All Off" command turns audio off in all rooms
- Room labels with adhesive backing included for easy front panel room identification
- Easy install guide included for quick setup
- 1 Year Limited Warranty
- Up to seven ATON RF Remotes can be programmed to a single RF Receiver
- RF Remotes will only control the RF Receiver they are programmed to
- RF Receiver easily connects to DLA Selectors using a simple RJ-11 plug
