Manual.pdf (107...

hi Chris,

Below are the replies to your questions on the above application.

The application exhibits appear to document compliance with FCC 15.231(a), but the application Form seems to document an application for 15.231(e). Please determine which Rule part is being used and ensure that the documentation/exhibits are consistent with that Rule Part.

<CCS Answer:> The correct rule part is 15.231(a)

The Users Manual indicates that this device can be setup to perform Polling with user selectable rate. Please explain how this operation complies with the requirements of:

FCC 15.231(a)(3) Periodic transmissions at regular predetermined intervals are not permitted. However, polling or supervision transmissions, including data, to determine system integrity of transmitters used in security or safety applications are allowed if the total duration of transmissions does not exceed more than two seconds per hour for each transmitter. There is no limit on the number of individual transmissions, provided the total transmission time does not exceed two seconds per hour.

<CCS Answer:> Please see attached revised user manual.

Best regards,  
September

Kindest regards,

September

Dear Thu Chan,

You are listed as the Technical Contact for the above referenced TCB application. The following item(s) need(s) to be resolved before the review can be continued:

The application exhibits appear to document compliance with FCC 15.231(a), but the application Form seems to document an application for 15.231(e). Please determine which Rule part is being used and ensure that the documentation/exhibits are consistent with that Rule Part.

The Users Manual indicates that this device can be setup to perform Polling with user selectable rate. Please explain how this operation complies with the requirements of:

FCC 15.231(a)(3) Periodic transmissions at regular predetermined intervals are not permitted. However, polling or supervision transmissions, including data, to determine system integrity of transmitters used in security or safety applications are allowed if the total duration of transmissions does not exceed more than two seconds per hour for each transmitter. There is no limit on the number of individual transmissions, provided the total transmission time does not exceed two seconds per hour.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Chris Harvey
