

8082C

TRANSMITTER CIRCUIT DESCRIPTION

The 312 MHz SAW RESONATOR oscillator drives the base of Q1 the final/buffer amplifier. The modulation provided by IC1. the output of Q1 has the matching network consisting of that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

Antenna and Power Source

There is no external antenna. There is no external ground connection. Electric current is supplied by a 12V dc. Battery.
