To whom it may concern,

Exceptional Circumstance to Keep Internal Photos Confidential

Silicon Laboratories Finland Oy / Bluetooth module BGM11S, IC: 5123A-11 / FCC ID: QOQ11 would like to have your authorization to keep the internal photos of BGM11S confidential. Silicon Labs has spent substantial effort in developing this product and it is one of the first of its kind in industry with a unique internal construction. Having the internal photos easily available to "competition" would negate the advantage they have achieved by developing this product. Not protecting the details of the design will result in financial hardship.

The module integrator doesn't have access to the internal parts of the module. The module is completely molded and removing the molding material mechanically will destroy the module and brake the parts in it.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Pasi Rahikkala', with a long horizontal line extending to the right.

Pasi Rahikkala

Staff HW Engineer

Silicon Labs
