

October 22, 2018

***Dear Application Examiner***

Here by we, Silicon Laboratories Finland Oy, would like to apply for C2PC to include IEEE 802.15.4 functionality into FCC ID QOQ13 / IC: 5123A-13.

Adding the IEEE 802.15.4 functionality is a FW change only. The models including IEEE802.15.4 functionality are labeled as models MGM13S02A, MGM13S02N, MGM13S12A and MGM13S12N. N refers to model without internal antenna and the A refers to the model with internal antenna. MGM13S02 is the low power version equivalent to BGM13S22 and MGM13S12 is the high power model equivalent to BGM13S32. The physical HW is same as originally listed models. There are no HW changes what so ever.

Pasi Rahikkala, Staff HW Engineer
