Dear Application Examiner,

Class 2 Permissive Change to Improve Antenna Efficiency of QOQMGM12P0 / IC: 5123A-MGM12P0

Hereby we would like to have your authorization for C2PC to improve antenna efficiency of MGM12P02 module which is previously certified for Zigbee/Thread/Bluetooth with FCC ID QOQMGM12P0 and IC: 5123A-MGM12P0. There is a BOM change in antenna impedance matching components. The new BOM is shown within this application. The physical layout and the schematic of the module did not change.

Since the change only applies to the antenna impedance matching, the conducted emissions and conducted power has not changed and thus these are not reported within this application. The new radiated emissions results are reported within this application.
