Re: Declaration of Similarity

FCC ID: QQQMGM210L
IC ID: 5123A-MGM210L

Please be advised that the differences between models MGM210L22F and BGM210L22F are same module HW with the same PCB layout, same BOM and same physical RF die. The only difference between the two models is that in BGM210L the Zigbee is disabled and this module is supporting only Bluetooth functionality

The can share RF test data because the physical HW and all RF parameters are identical.

Sincerely yours,

Pasi Rahikkala
Staff HW Engineer
