Attention: Applications Examiner
Re: Class 2 Permissive change to add co-located antenna
Product: DTS Transceiver (Bluetooth)
Applicant: BlueGiga Technologies
FCC ID: QOQWT12
Original Grant Date: 4/10/2006

To Whom in May Concern,

The referenced device has a grant note restricting co-location operation. A class 2 permissive change is being submitted to allow co-located operation with a certified VHF band Part 90 licensed transmitter manufactured by Input-Output Inc.

The Input-Output FCC ID is MCV-FSU101. Grant is dated 25 September 2006.

MPE calculations have been submitted for the combined RF exposure from the two transmitters operating simultaneously in the Input-Output product, the combined exposure levels at 20cm are well below the limits in the Rules.

If you have questions or need further information, please contact the undersigned.

Sincerely,

T.N. Cokenias
