RE: FCC ID: QP7802UIG1_ATCB001887
Attention: Joann Chen

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the FCC will not allow an application to be certified or uploaded to the FCC server without an FRN. If the applicant does not have an FRN they must register for one. This can be done on the following web address - <https://svartifoss2.fcc.gov/cores/CoresHome.html> . Please note that the name and address of the applicant must match that on the 731. Please provide this information when you have obtained it from the applicant.
2. FYI – no action needed. Please note that intentional radiators should be tested stand alone for 15.247. The ANSI setup shown in the test setup photos are for digital device compliance to 15B.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
