Labeling – configurations

1) 5 in 1, Standalone: reference 47 CFR Part 15.19 (a) (3)

When the MEI 5 in 1 credit card bezel is used standalone a metal back plate covers the back side of the bezel effectively blocking off access to the electronics from dirt or serviceman. The product label is placed on the outside of the back plate. The label contains the FCC ID & IC technical acceptance ID number as well as required FCC statement, model, part number, and serial number. The FCC ID, IC technical acceptance ID, required FCC statement (in English & French) are also placed into the installation guide.

2) 5 in 1, Mounted on the Series 2000 bill acceptor: reference 47 CFR Part 15.19 (a) (5)

When MEI 5 in 1 credit card bezel is used with an MEI Series 2000 bill acceptor the MEI 5 in 1 back plate is not used. The MEI 5 in 1 credit card bezel is then mechanically mounted to the front of a Series 2000 bill acceptor. The product label is placed on the inside, bottom, flat section of the bezel prior to mounting so that it is always part of the product. The reason for this location is to preserve the label from the harsh external vending environment and to maintain the physical aesthetics externally of the MEI 5 in 1 credit card bezel. The FCC ID, IC technical acceptance ID, required FCC statement (in English & French) are also placed into the installation guide.

3) The next page is meant to show the label location only. The artwork on page 1 of this exhibit will be used for the label.
