

This device is Bluetooth stereo headset

It work for almost all kind Bluetooth band , the frequency is from 2.402GHz to 2.480GHz ,use PCB antenna to work 10M distance,

The main chips is ISSC 1681 for work A2DP stereo file .building Li- polymer battery ,system with charger circuit by micro USB .

BT Version: “Bluetooth specification V2.1+EDR”

There are three different modulations for Bluetooth V2.1+EDR: (Data rate-Modulations type)
1M-GFSK\2M-[]/4DQPSK\3M-8DPSK”

antenna Gain: “Max 2db”.

ISSC BM81SPK01 is the model name of module with ISSC 1681 IC integrate
