Dear Application Examiner,

In accordance with DA 00-1407 – 26th Jun 2000 “Part 15 Unlicensed Modular Transmitter Approval”, iWOW Connections Pte Ltd believes it has met all of the requirements set out in the document for the granting of modular approval.

1. “The modular transmitter must have its own RF shielding.” The radio portion of this module has been shielded, please see exhibition External Photo.
2. “The modular transmitter must have buffered modulation/data inputs.” The EUT has been buffered data input; it is integrated in chip PMB8810.
3. “The modular transmitter must have its own power supply regulation.” The power management PMB8810 chip controls the power up, power down, and power transitions of other devices associate to a specific functionality. The RF converter embedded inside PMB8810 chip will influence the frequency radiation and have powered with a voltage of 1.8VDC.
4. “The modular transmitter must be tested in a stand-alone configuration.” The EUT was placed on a Development Starter Board as a stand-alone configuration. Please refer to the Test Result of mode in the test report.
5. “The modular transmitter must be labeled with its own FCC ID number.” Please see exhibit Label Sample for the FCCID of this module.
6. “The modular transmitter must comply with any specific rule or operating requirements

applicable to the transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements.” Detail instructions for maintaining compliance are given in the User Manual.

7. “The modular transmitter must comply with any applicable RF exposure requirements.” The EUT is compliant with all applicable RF requirements. RF Exposure is addressed in the RF exposure exhibition.

Please contact me if you have any further questions. Thank you for your attention.
