

## Legal Notice

### All rights reserved

Your phone is manufactured by Mobiwire SAS.

Reproduction or transfer of parts or of the entire content of this manual is prohibited in any form without the prior written permission of Mobiwire SAS.

### Trademarks

MobiWire® and the logo MobiWire® are trademarks or registered trademarks of the company Mobiwire SAS. Other company or product names mentioned herein are the property of their respective owners.

### Statement

Mobiwire SAS reserves the right to revise or update the information contained in this manual without prior notice. This manual was created with highest diligence in order to guarantee the correctness of its content. However, all declarations, information and recommendations in this manual and their accuracy, reliability or content do constitute neither an explicit nor an implicit warranty claim, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose.

## Limited Liability

The software, software content and accessible services of this device belong to a third party and are protected by copyright, patent fees, trademarks and/or other laws governing intellectual property. Without limiting the foregoing, it is not allowed to adapt, copy, republish, transfer, publish, communicate, translate, sell, exploit or distribute in any way neither the software content nor the services/applications offered by third parties integrated into the device without explicit authorization of the content owner or service provider concerned.

The content and the services are provided only for private use and not for commercial purpose. You must not use the content or the services without explicit authorization of the content owner or the service provider/rights holder.

To the extent allowed by local law, Mobiwire SAS does not take any responsibility, not explicit neither implicit, regarding the content and services provided.

Mobiwire SAS does not provide any explicit or implicit warranties, including but not limited to any warranty of merchantability and adequacy for a particular purpose.

The exactitude, validity, actuality, legality and, details of the content or services integrated in the device provided by third parties, are not guaranteed by the manufacturer and it cannot be held responsible in any of the following cases: negligence, contractual liability or tortious liability, direct or indirect damage, accessories, special or consecutive lawyers' fees, fees or any other damage.

If any damage results from the usage of the content or the services by yourself or a third party (or any information mentioned in this content or services aforesaid), the manufacturer can't be held responsible even though it had been informed of the eventuality of the occurrence of damages.

In case that certain countries do not authorize the disclaimer of implicit warranties or the limitation of consumer rights, it is possible that those disclaimers and limitations do not apply in your case.

Services provided by a third party can be suspended or interrupted at any moment, and the manufacturer does not guarantee that a certain content or service stays available during a specific period of time. Third parties send the content and services through the network and transmission equipment, that are under the manufacturer's control. Without this limiting the general information of this present statement, the manufacturer disclaims explicitly all responsibility in case of interruption or suspension of any content or services provided for this device by a third party. The manufacturer cannot be held responsible for the customer service related to the content or the services.

The manufacturer cannot be held responsible for the customer service related to the content or the services. All questions or service requests referring to the content or the services have to be directed directly to the suppliers of the content or the services concerned.

The album cover can be modified or deteriorated by downloading it to the multimedia player. Downloading an album cover without any authorization, can go against copyright and/or the intellectual property of an artist.

In case of any infraction committed by the user regarding copyrights and intellectual property such as the download of an album through the multimedia player, the manufacturer is not liable.

The user must make sure that the album's license authorizes him to download and, potentially modify the album.

Mobiwire SAS does not guarantee, declare or promise to be able to repair or replace a Mobiwire Product under this warranty without risk and / or loss of information and / or data stored on the Mobiwire Product (cf. article Data protection and software updates) Mobiwire SAS cannot be held responsible for any damage linked to the loss of stored data.

## MobiWire Warranty

Mobiwire's products profit from a full warranty throughout the indicated period. Mobiwire's warranty lasts over 24 months starting from the original date of purchase by the first end customer and is transferable only between end users.

### Exclusions of Warranty

This warranty is only applicable to defects that are parts of the fabrication process. MobiWire SAS shall have no liability under the warranty in respect of:

#### 1. Defects breakdown or malfunction due to:

- failure to follow the installation process and instructions for use; or
- an external cause to the Product (or accessory) (including but not limited to, shock, lightening, fire, vandalism, malevolent action, contacts with various liquids or vermin or water damage of any nature, inappropriate electric voltage); or
- a lack of care; or
- poor environmental conditions, particularly those related to temperature and humidity, effects of variations of electric voltage, electric network or earth interferences
- repair, work without the written approval of MobiWire SAS (opening or attempt to open the Product (or accessory)) or maintenance of the Product (or accessory) by persons not authorized by MobiWire SAS,

2. problems related to access and/or connection to the Internet such as interruptions by access networks or malfunction of the line used by the subscriber or his correspondent,

- transmission faults (for example poor geographical coverage by radio transmitters, interference or poor line quality),
- the local network fault (wiring, servers, workstations) or the failure of the transmission network (such as but not limited to interferences, fault or poor quality of the network)
- modification of the parameters of the cellular network carried out after the sale of the Product (or accessory)

3. software and associated updates different from the ones provided, developed or authorized by MobiWire

4. improper use of the product, or its accessories and any problems occurring during the delivery of the product

5. malfunction due to the use of products or accessories which are not compatible with the Product (or accessory)

6. Products declared as stolen by the competent public authorities or exhibiting password protection or other security measures provided to prevent unauthorized access to the Product and that you cannot prove that you are the authorized user of the product .

7. opening or locking of an operator's SIM key and work due to the non-functioning of the Product (or accessory) caused by the opening or locking of an operator's SIM key carried out without the original operator's approval.

8. The defects coming from materials, a design, provided or chosen by the customer.

9. Product with identification label (IMEI) which is damaged, destroyed, totally or partially removed and product with wrong identification label (IMEI)

## Device usage and Safety precautions

### Radiofrequency and health information

Health authorities advise that studies continue and, as a precaution, to limit cell phone emitted electromagnetic fields exposure by announcing actions easily put in place. They also advise cell phone users, when they are used closely to the human body, to conform to terms of use with special care to distances mentioned in cell phone user guides. Moreover, safety rules must be followed for oneself and others.

### General recommendations regarding reducing your radio waves exposure

- Use a headset during your calls. It allows a lower head exposure to radio waves. However, when in use, pay attention to your surroundings (crossroads, hazardous locations...).
- Ward, with or without a headset, your cell phone or any other mobile device off pregnant women womb or any teenager lower abdomen.
- Also use text functions or web browsing from your cell phone or tablet. Those functions require that you look at your cell phone or tablet screen from afar and thus enable a distance between your abdomen or your head and your device, which lowers their exposure.
- Use your device in good coverage conditions because it automatically adjust its emission power to radio signals that it receives from your operator. Coverage is good when 4 or 5 network signal are displayed on screen. It may have some network coverage degradation in specific aera or situations, specifically in lift, train, car, underground carpark or just in an aera with a limited coverage.

## Safety measures for users and non-users

- Do not use your cell phone while driving, even while using a headset. Using your device while driving is dangerous and is a serious accident factor coming from distraction created by the conversation itself or any other usage (text, web browsing...).
- Ward the cell phone or any other device off 15cm from any electronic implant (pacemaker, insulin pump, neurostimulator...) and use them from the opposite side of the implant to avoid any interference. Refer to your device user guide and consult your doctor.
- Respect safety rules and usage restrictions related to certain locations or certain situations (plains, hospitals, gas station, professional workshop, schools...).

As a precautionary measure, health authorities recommend to parents that wish to put a device at their children or teenager's disposal to limit their exposure to mobile telecommunications technologies and to encourage a moderate use of their equipment.

Be sure to inform them of any mean allowing them to reduce their exposure when electromagnetic fields emitting devices are in use (tablets, cell phones, LTE Keys...). If any adverse effect should be underscored, children and teenagers could be more sensitive, given their organism is still developing. Encourage a moderate usage of mobile telecommunication technologies. Encourage, even if not linked to radiofrequencies exposure, a moderate usage of cell phones, by avoiding night-time telecommunications, and by limiting call duration and frequency...

### Usage tip to guarantee an optimal functioning of your phone

- When making or receiving a phone call, hold the phone next to your ear with the base pointing towards your mouth.
- Regularly back up and empty your phone data (photos, videos, etc.) in order to avoid the effects of memory saturation (slowing down, blocking, etc.).
- Completely shutdown all unused applications.
- Regularly turn off / restart the phone to cleanly close applications running in the background and which may affect battery life.
- Update the phone when a maintenance version is available.
- Charge the phone for at least 1 / 2h in the event of a long period of non-use (to avoid cases of deep discharge).
- Use the charger if supplied, of the same brand if available or respecting the following technical characteristics:
  - CE standard marking.
  - A voltage of 5.0V.
  - Amperage ranging from 550 mA to 2A.

Any malfunction caused by a charger that does not comply with these characteristics may be subject to exclusion of warranty.

## Disposal of your old appliance

Your Product is an electronic device that must be recycled according to the recommendations. Please contact your salesperson to find the recycling circuits available.

If your device has a removable battery, be sure to recycle it according to the recommendations.

This symbol on the product, accessories or documentation indicates that neither the product nor its accessories (chargers, headphones, connection cable etc.) can be disposed of along with other general household waste.

This symbol on the battery indicates that the battery for this product should not be disposed of at the end of the battery life along with other general household waste.

## SAR (RF Exposure Information)

This device meets the government's requirements for exposure to radio waves.

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications. Commission of the U.S. Government.

The exposure standard for wireless mobile devices employs a unit of measurement known as the Specific Absorption Rate or SAR. The SAR limit set by the FCC is 1.6 W/kg.

\*Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands.

Even if the SAR is measured at the highest certified power level, the actual SAR level while operating can be below the maximum value.

This is because the device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR value for this device reported to the FCC has been obtained under the following conditions: GPRS mode ON with all bands.

<b>SAR at head</b>	1.033 W/kg
<b>SAR at body (10 mm)</b>	1.177 W/kg

While there may be differences between the SAR levels of various devices and at various positions, they all meet the government requirement.

For body worn operation, to maintain compliance with FCC RF exposure guidelines, use only accessories that contain no metallic components and provide a separation distance of 10 mm (0.4 inches) to the body. Use of other accessories may violate FCC RF exposure guidelines and should be avoided.

The FCC has granted an Equipment Authorization for this device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this device is on file with the FCC and can be found under the Display Grant section of [www.fcc.gov/oet/ea/fccid/](http://www.fcc.gov/oet/ea/fccid/) after searching on FCC ID:

for the 4G version: QPN-H6322

This device is compliant with SAR for general population / uncontrolled exposure limits in ANSI/IEEE C95.1-1999 and has been tested in accordance with the measurement methods and procedures specified in OET Bulletin 65 Supplement C.

### Power supply information

<b>Supplier</b>	DongGuan AoHai Power Technology Co.,Ltd. Block A & 3-5F of Block B, Zhenlong East Road No.6, Jiaoyitang, Tangxia Town, Dongguan Guangdong, P. R. China
<b>Reference</b>	A18A-050100U-US2
<b>Input Voltage</b>	110-240Vac
<b>Input alternative current frequency</b>	50/60Hz
<b>Output voltage</b>	5.0Vdc
<b>Output Current</b>	1.0A
<b>Output Power</b>	5.0W
<b>Average active efficiency</b>	73.6%
<b>Efficiency at low load</b>	73.6%
<b>No-load power consumption</b>	100mW

### FCC Compliance

This mobile device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This mobile device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment receives and transmits radio frequency signals. This equipment may cause harmful interferences with other radio communications equipment if it is not installed and used in accordance with the manufacturer's instructions. However, there is no guarantee that interference will not occur in a particular installation if this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on.

The user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- The antenna(s) used for this transmitter must not be collocated or operating in conjunction with any other antenna or transmitter.
