### Safety

In order to ensure the phone is used safely and correctly, please read the precautions below carefully before use

1 General precaution Your phone is only suitable for the battery and charger approved by our

company or else it may cause the battery to leak, overheat, explode or even · Do not knock, vibrate or throw the phone heavily to avoid malfunction,

fire, overheating, explosion or fire. · If there are abnormal phenomena, like temperature rising, color change

or distortion during the usage, charging or storage of the battery, please stop using it and replace it with a new battery. · It may burn the skin if liquid in the battery leaks onto skin or clothes. If this

hospital at once • Please keep the battery away from fire to avoid fire and explosion if the

battery leaks or emits a strange smell. · Do not place expose the battery to moisture or it may cause overheating

fumes and corrosion · Do not use or place the battery under direct sunlight, or in hot places or,

it may cause leakage and overheating, thus reducing performance and shortening the lifespan.

 Do not charge the battery for over 24 hours continuously. Use careful with the earphone maybe possible excessive sound pressure

from earphones and headphones can cause hearing loss

1.2 Precaution for the use of charger

Do not cause short circuit to the charger, or it may cause electric shock, fumes and damage to the charger. · Do not use the charger if the power wire is broken, or it may cause fire

and electric shock.

Please remove accumulated dust on the power plug.

Do not put water containers next to the power supply to avoid overheating, fire, electric shock and malfunction in case they come into

Do not disassemble or tamper with the charger or it may cause persona injury, electric shock, fire and the damage of the charger. Do not use the charger in places of high humidity, like bathrooms, or it

may cause electric shock, fire and damage of charger. · Do not touch the charger, power cord or power plug with wet hands or it

• Do not put heavy objects on the power cord or change the power cord or it may cause electric shock and fire.

Please unplug the power socket before cleaning and maintenance.

Please hold the charger to unplug the socket as pulling the power cord may damage the power wire and cause electric shock and fire.

# 1.3 Cleaning and maintenance

· As the phone, battery and charger are not waterproof, do not use them in

places of high humidity and avoid them being wet by rain Please clean the battery and charger with a soft dry cloth

Never use alcohol, thinner or solutions, like benzene, to wipe the phone · Dirty sockets can cause poor contact and power down, and even make recharging unavailable. So, please clean them periodically

1.4 Common Precaution Mobile Phone:

> · Please use the phone in an environment with temperature between -10°C- 40°C and humidity of ≤75%.

Please use the phone far away from regular telephones, TV sets, radio sets and office automation equipment, to avoid affecting the normal use of happens please flush with plenty of clean water immediately and go to a these equipments and mobile phone

• Store the battery in cool and ventilated place without direct sunlight.

· The battery has a limited lifespan. The usage of battery will be shortened progressively due to frequent charging. Once the battery is out of use, it means that its lifespan has ended, and you will need to replace it with an approved new battery.

· Do not dispose of old batteries as household waste. Give them to specified disposal places and follow any stipulated instructions for disposal. CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE, DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

· Do not charge under following conditions:

-- places with direct sunlight

-- places with ambient temperature less than -10°C or over 40°C, wet or dusty places with strong vibrations (it may cause malfunction); -- places near electrical appliances (it may affect the image and sound) like

TV set radio etc -- Adapter shall be installed near the equipment and shall be easily accessible. The plug considered as disconnect device of adapter

nvironmentally friendly disposal Old electrical appliances must not be disposed of together with the residua waste, but have to be disposed of separately. The disposal at the comm collecting point via private persons is for free. The owner of old appliance responsible to bring the appliances to these collecting points or to similar collection points. With this little personal effort, you contribute to recycle valuable raw materials and the treatment of toxic substances

# Getting to know your touch phone

# Starting up the device

Open the SIM card and Memory card rubber.

· Locate the SIM card slot, and then insert the SIM card with its go

contacts facing up. Note: The phone support one SIM card. The card will support 4G card 3G card and 2G card. If you need to use 4G/3G operation, please insert

a 4G/3G card in the card slot

Open the SIM card and Memory card rubber.

 Locate the Memory card slot, and then insert the Memory card with its gold contacts facing up.

### Charging the Battery

New batteries are shipped partially charged. Before you start using you device, it is recommended that you install and charge the battery. Some batteries perform best after several full charge/discharge cycles. Note: Only the AC adapter and USB sync cable provided with your device

must be used to charge the device. Connect the USB connector of the AC adapter to the sync connector on your

device, and then plug in the AC adapter to an electrical outlet to start charging the battery.

As the battery is being charged while the device is on, a charging icor appears in the title bar of the Home screen. After the battery has been fully charged, a full battery icon appears in the title bar of the Home screen. Warning:

• Do not remove the battery from the device while you are charging it using the AC or car adapter • As a safety precaution, the battery stops charging before it overheats.

To power off your phone, press & hold POWER. Or, release, the Phone options menu opens. Select 'Power off' and confirm.

To power on again, press & hold POWER.

This device complies with Part 15 of the FCC Rules. Operation is subject

(1) This device may not cause harmful interference

2) This device must accept any interference received, including

nterference that may cause undesired operation. NOTE: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on. the user is encouraged to try to correct the interference by one or more of the following measures

---Regrient or relocate the receiving antenna.

occur in a particular installation

-Increase the separation between the equipment and receiver. -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

---Consult the dealer or an experienced radio/TV technician for help.

Body-worn Operation This device was tested for typical body-worn operations. To comply With

RF exposure requirements, a minimum separation distance of 1.5cm must be maintained between the user's body and the handset, including the

Third-party belt-clips, holsters, and similar including the antenna. Third-party helt-clins holsters and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and

This Model Meets International Guidelines for Exposure to Radio Waves

The guidelines use a unit of measurement known as the Specific Absorption Rate or SAR The SAR limit for mobile devices is 1.6 W/kg and the highest SAR value for this device when tested at the ear was 0.3 W/kg per 10 gram of tissue. As mobile devices offer a range of functions they can be used in other positions, such as on the body as described in this user quide, it is recommended to keep it away from your body at least 10mm during operation, but the distance of 0mm between the head and the device As SAR is measured utilizing the devices highest transmitting power the

actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a 'hands-free' device to keep the mobile phone away from the head and body.

Additional Information can be found on the websites of the World Health Organization (http://www.who.int/emf).
