Hi Alice,

One more time - see below. After you resend the test report with the new table, we should be able to grant. Please remember FYI below.

Regards,

Marianne

RT questions:

- 1. The data table on p. 15 of 23 is not readable- please resend.
- 2. FYI an incorrect limit is listed for the radiated spurious emission at 28.57 MHz. It should be $3000 \mathrm{uV/m}$ @ 3m.
