Enterasys Networks Access Point Professional Installation

To whom it may concern:

We, Enterasys Networks, Inc. the networking division of Siemens Enterprise Communications Group, the responsible party for the model number WS-AP3710e. Hereby declare and affirm these products will operate only within the specifications authorized by the Approved Regulatory Authority when delivered to the customer. These Access Points (APs) must be installed by professionals to ensure proper operation.

1. These Access Points are intended to be used in commercial and industrial environments only. They are not available for sale to the general public through any retail outlets.
2. The WS-AP3710e Access Point can be operated only in conjunction with the Enterasys Networks Wireless Controllers. The cost of such a system precludes the general public from purchasing this product.
3. The Enterasys Networks Wireless Controllers are used to configure and set all radio functions in the Enterasys Networks Wireless Access Points. These controllers are designed to allow for management of large numbers of APs deployed across a commercial or industrial campus.
4. The nature of this type of commercial deployment requires professional expertise to design the RF deployment for optimal coverage. The professional installer must perform site surveys to select the appropriate AP, antennas, cabling, and channel distribution.
5. Upon deployment the Professional Installer must utilize the Wireless Controller to select the appropriate approved antenna that has been installed on the AP. Next the Installer must set the maximum output power in accordance with the tables provided in the Installation Guide.
6. Once the installation is complete the end users of the AP deployment do not have access to modify any RF parameters of the system.

If you have any questions, or if you require further explanation, please do not hesitate to contact us.
Kind regards,

Thomas Whissel, Regulatory Compliance Manager
