Reference FRZ200-1000 MiWi transceiver - FCC ID: QR5ROTR00471.

We are seeking 'Limited Modular Approval' for the FRZ200-1000MiWi transceiver. The requirements for 'Modular Approval' are;

- 1) The radio elements must have the radio frequency circuitry shielded. - not compliant
- 2) The module has buffered modulation/ data inputs ensuring that the device complies with Part 15 requirements with any type of input signal.
- 3) The module includes power supply regulation as a part of it's design.
- 4) The module has a unique antenna connector and is to be marketed with a specific antenna only.
- 5) The module has demonstrated compliance in a stand alone configuration.
- 6) The module is labelled with a permanent FCC label.
- 7) The module complies with all specific rules applicable to the transmitter including the conditions which are a part of the integration instructions when assembled.
- 8) The module complies with RF exposure requirements.

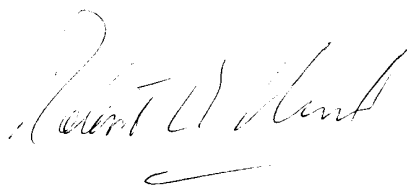

The FRZ200-1000 complies with all the above except for 1) the screening over the RF circuitry. We are seeking 'Limited Modular Approval' on the basis that it will only be used in the following three final products:

Controller, model number GENII/WARP/200
Remote Transmitter, model number GENII/FRZ/200A & B
Repeater, model number GENII/SRPT/200

The test report shows results for both

- a) Standalone configuration.
- and
- b) Incorporation in the three host products.

Sincerely,

Robert E Head
