**Re: Class II change for TR-WMX-58-16 product family**

**FCC ID: QRF-PVE58XBY**

The firmware of the TR-WMX-58-16 product has been upgraded to add the functionality of operating in 10 MHz bandwidth.

**The TR-WMX-58-16 is electrically and physically unchanged since it was certified for operation under the FCC ID QRF-PVE58XBY. It uses the same radio module, and the enclosure, antenna and connecting cables are identical.**

Radiated emission and conducted test data is provided in the attached EMC report to demonstrate that the unit complies with the FCC emissions limits. This report is the appended version of that already filed under the FCC ID listed above and comprises the current application for certification.
