**Re: Confirmation of compliance**

**FCC ID: QRF- QSFNYON3**

This is to verify that the device with the referenced FCC ID is capable of operating in four frequency bands, namely 2400-2483.5 MHz, 5250-5350MHz, 5470-5725MHz, and 5725-5850MHz. Operation in 2400-2483.5 MHz and 5725-5850MHz bands can be implemented using 5, 10 and 20 MHz bandwidths and has been certified under the FCC ID: QRF-NYYON23.

Nonetheless, when operating in 5250-5350MHz and 5470-5725MHz bands, the device only uses 20MHz transmission bandwidth and the selection of other bandwidths is prohibited by the product's firmware.

Thank you for your attention in this matter.

Bud Patterson

A handwritten signature in black ink that reads "Bud Patterson". The signature is written in a cursive, flowing style.
