Re: Change in Identification – FCCID: QRF-TRZMX27

This letter is to inform you that the products TR-MX2c, TR-MX2, TR-MX22, and TR-MX27 are electrically and functionally identical (same radio module, same amplifier, same hardware platform) to the N2 currently marketed by Alfa Networks under the FCC ID UQ29283.

The date of the original grant of equipment authorization is 04/29/2012. No modifications have been made to the construction or operation of the unit, the change in identification is solely for marketing purposes. The only difference is company name and the product label; a sample is attached. Photographs detailing the exterior of the unit are also submitted.

The equipment bearing FCCID UQ29283 will continue to be marketed by Alfa Networks.

Sincerely,

A handwritten signature in black ink that reads "Michael Rex".
