

1 Welcome

Thank you for purchasing the L2Z is packaged with the following state of the art features:

- VGA Camera
- 1.77 Inch screen
- Audio Player
- FM Radio
- Video and FM Recording
- Dual SIM (GSM)
- T-Flash Card support (up to 16 GB)
- Mexican Language Support

Important:

1. Please read the contents of this manual to fully utilize the features of this phone.
2. Please read the Guidelines section provided with this Reference guide.

Menu > Settings > Security > Blacklist
Blacklist undesired SMS senders and caller so that you do not receive SMS and calling from them.

5 Contacts

Your phonebook stores all your saved contacts for anytime use. Your phonebook data can be stored in your SIM card or your phone memory.

You can manage your contacts from here.
Menu > Phonebook

5.1 View contact

5.2 New

Menu > Phonebook > Left Key > New

5.3 Delete multiple

Menu > Phonebook > Left Key > Delete multiple

In the Contacts list, select the entry you want to delete.

5.4 Move

Menu > Phonebook > Left Key > Move

In the Contacts list, select the entry you want to move to SIM or phone.

5.5 Add to Blacklist

Menu > Phonebook > Left Key > Add to blacklist

2 Know Your Phone

1.1 Insert SIM Card

The RAGE PS16 is a Dual SIM mobile phone allowing you to use one SIM Cards.

1. Switch off the mobile phone and remove the rear cover and battery.

2.2 Insert SIM Card

1. Insert the SIM card correctly in the SIM slot(s).
2. Finally, insert the battery and replace the rear cover of the mobile phone.

2.3 Insert Memory Card

1. Switch off the phone and remove the rear cover and the battery.
2. Insert the memory card into the slot.
3. Finally, insert the battery and the rear cover of the mobile phone.

Note: Use only compatible memory cards approved by K22+Incompatible cards may damage the slot or corrupt the data stored in the card.

3 Basic Operations

3.1 Switch Phone ON/OFF

To switch ON/OFF your phone, press and hold the End key for a few seconds.

3.2 Unlock the phone

If you do not use the phone for a while, the screen is replaced with a locked screen.

1. Press any key to activate the screen.
2. Press Left key, and then press * key.

3.3 Make a call

You can make a call in the following ways:
Enter the desired number in standby mode and press the Call key to make the call.

Go to Menu > Phonebook and then select and dial the desired number.

Just press the Call key to dial the contacts listed in Call logs.

You can also dial a contact from the messages.

4 Notable Features

4.1 Secure your Phone

Menu > Settings > Security > Phone Locked

Let you lock/unlock your phone via a security password which you can change anytime.

The default security code to unlock the phone is 0000.

Note: After you activate the phone lock, you would be asked for a password when you power on your phone next time.

4.2 Blacklist

Allow you to black list selected numbers. In this case the contact will be blocked from calling you up.

Import/Export Contacts
Menu > Phonebook > Left Key > Import/Export

You can copy, Import or Export contacts entries stored in the SIM card to the phone memory and vice-versa.

5.6 Others

Speed dial
Menu > Phonebook > Left Key > Others > Speed dial

Set speed dial and view memory status.
Memory status

Menu > Phonebook > Left Key > Others > Memory status

Check the memory status of SIM, and Phone.

5.7 Most used

Menu > Phonebook > Most used

View the contacts that most used.

5.8 Groups

Menu > Phonebook > Groups

Press the Left/Right navigation key to access the Group tab. Set up a list of numbers with similar preferences such as ringtone, profile etc

6 3Messages

6.1 Write message

Menu > Messages > Write message > New SMS

You can compose and send SMS. Pressing the Left Key during/after composing the message gives you a host of messaging features.

6.2 Use message Templates

Menu > Messages > Templates
Enter into preset message templates and use them. These preset templates can save you time if the theme of your message is the same as those existing in the template.

6.3 Voice mail server

Menu > Messages > Voice mail server
You can activate voicemail service to redirect your incoming calls (based on your call settings) to a voicemail server and retrieve them later via SMS alerts.

To divert incoming calls to a voicemail server, go to Settings>Phone tab > Call Divert> Voice> (choose the desired call divert condition) > Activate> Phone Number/Voicemail Number.

6.4 Settings

Menu > Messages > Options>Settings
You can set your desired parameters for SMS, push message and Others.

6.5 Delete all

You can choose all messages in the Inbox or others to delete.

6.6 Message capacity

6.7

Menu > Messages > Options > Message capacity

View the memory status of your SMS .

7 3Call logs

7.1 View Call Logs

Menu > Call Logs

Tip: Directly access the call logs of by pressing the Call key in idle mode.

The Call log lists the calls you have recently dialed, received, missed for SIM1 and SIM 2.

Press the Left/right navigation keys to access various call logs and work on the call logs.

8 3Multimedia

8.1 Camera

Menu > Multimedia > Camera

Press the left key in camera mode to choose various settings

Shortcut keys: Press the number keys on the phone's keypad to choose various settings.

8.2 Video recorder

Menu > Multimedia > Video recorder

Press the OK Key to start recording.

■ You can press Options switch to Camera and vice versa.

■ You can also press Options key to choose memory

■ Press Left key to choose various settings

Shortcut keys: Press the number keys as shortcuts on the phone's keypad to choose various video settings.

8.3 Image Viewer

Menu > Multimedia > Image Viewer

Let you to view your saved images. You can also send the images via MMS or Bluetooth or use it as contact icon or wallpaper, etc.

8.4 Audio Player

Menu > Multimedia > Music Player

The phone comes with an inbuilt audio player that plays all your favorite songs stored in the phone memory or memory card.

■ While in music mode, press the Left key to choose various music options

■ Adjust Volume: Press * # keys to adjust the volume

8.5 Video player

Menu > Multimedia > Video player

10

Let you play videos stored in your phone or memory card.

Press 2 key while playing a video to change the display mode.

8.6 Recorder

Menu > Multimedia > Recorder

You can record surrounding sounds using this feature

8.7 FM radio

Menu > Multimedia > FM radio

Your phone comes with an FM radio to let you listen to FM channels.

Go to Options> Search Channels> Auto Search to fill up the channels.

Press the number keys on your keypad in accordance to the channel list.

Press OK key to start/stop the radio.

Press the Up or Down key to increase/decrease the volume.

9 3File manager

To manage the space of phone or memory card.

10 3Internet

10.1 Internet

Menu > Organizer>Internet

11

To access this menu, enter the Main Menu in the standby mode and then select Internet. You can use the network-related services with this function.

You also can use STK.

11 3Settings

11.1 Call settings

Menu > Settings>Call settings

To perform the Dual-SIM, call divert, call waiting, call barring., Hide ID, Others

11.2 Phone settings

Menu > Settings>Phone settings

To perform the Dual-SIM, call divert, call waiting, call barring., Hide ID, Others

11.3 Display settings

Menu > Settings>Display settings

Perform related Settings shown as switch motor drawing, wall paper, standby interface, according to some of the protective screen, backlight and the backlight time, key backlight time setting

11.4 Security settings

Menu > Settings>Security settings

Execute related the SIM1/2 security, mobile security, automatic keyboard lock, and end keys locked fast, anti-theft tracking and fixed dialing, blacklist privacy protection.

12

11.5 Profiles

Activation and customize the required profile is general, silent, meeting, indoor, outdoor, headphones, bluetooth's style..

11.6 Calendar

Menu > Tools> Calendar

Call the other directly, you can hear the other side of the recording

11.7 Alarm

Menu > Tools > Alarm

To use the alarm service available with your mobile phone.

11.8 Calculator

Menu > Tools > Calculator

To arrange your journey according to calendar.

11.9 Torch

Menu > Organizer > Torch

To turn on/off torch.

11.10 Bluetooth

Menu > Tools> Bluetooth

Open the bluetooth, for file transfer and acceptance

11.11 World clock

Menu > Tools > World clock

To use the world clock function.

13

11.12 Stopwatch

Menu > Tools > World clock

To use the world clock function

11.13 Timer

Menu > Tools> Timer

Set up time, time will have ring tone hint

You also can use STK.

11.14 Ebook

Menu > Tools > Ebook

To read TXT files on the card

11.15 Fun&Games

Menu > Tools > Games

You may play the built-in games and perform the game .

12 3Health and Safety Precautions

Please read these simple guidelines. Not following them may be dangerous or illegal.

SAR Compliance

Your phone is designed not to exceed the limits of emission of radio waves recommended by international guidelines.

SAR (specific absorption rate) is the measurement of body-absorbed RF quantity when the phone is in use. SAR value is ascertained according to the highest RF level generated during

14

laboratory tests.

The SAR value of the phone may depend on factors such as proximity to the network tower, use of accessories or other accessories.

SAR Recommendations

The highest SAR value of the device at the head and body are 0.902 W/kg respectively averaged over 1 gm of human tissue.

■ Use a wireless hands-free system (headphone, headset) with a low power Bluetooth emitter.

■ Please keep your calls short and use SMS whenever more convenient. This advice applies especially to children, adolescents and pregnant women

■ Prefer to use your cell phone when the signal quality is good.

■ People having active medical implants should preferably keep the cell phone at least 15 cm away from the implant.

Maintain a preferable distance of 15 mm from the device.

Safe Driving

■ Do not use the phone while driving. When you have to use the phone, please use the personal hands-free kit.

■ Please do not put the phone onto any passenger seat or any place from which it may fall down in case of vehicular collision or emergency braking.

During Flight

■ Flight is influenced by interference caused by

15

the phone. It is illegal to use a phone on the airplane. Please turn off your phone during a flight.

In Hospitals

■ Your Phone's radio waves may interfere with the functioning of inadequately shielded medical devices. Consult a physician or the manufacturer of the medical device to determine whether they are adequately shielded from external Radio Frequency. Switch off your device when regulations posted instruct you to do so.

■ To avoid potential interference with implanted medical devices such as a pacemaker or cardioverter defibrillator:

■ Always keep your phone at least 15.3 centimeters (6 inches) from the medical device.

■ Do not carry the wireless device in a breast pocket.

■ Turn off the phone if there is any reason to suspect that interference is taking place.

■ Follow the manufacturer directions for the implanted medical device.

■ If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

Unsafe Areas

■ Please turn off your phone when you are close to a gas station or in the vicinity of any place where fuel and chemical preparations, or any other dangerous goods are stored.

16

13 3Taking Care of Your Device

Your device is a product of superior design and craftsmanship and should be handled with care: The following suggestions will help you protect your phone:

■ Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will rust electronic circuits. If your device does get wet, remove the battery without turning on the device, wipe it with a dry cloth and take it the service center.

■ Do not store the device in high or cold temperature. High temperatures can shorten the life of electronic devices and damage batteries.

Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.

Do not attempt to open the device other than as instructed in this guide. Repairing this phone by yourself other than our authorized service agents/centers goes against the warranty rules.

Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.

Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. Only use a soft, clean, dry cloth to clean the surface of the device.

■ Do not store your device near magnetic fields

17

or allow your device to come in contact with magnetic fields for extended period of time.

Battery Recommendations:

Please put the battery in a cool and well-ventilated place out of direct sunlight. We recommend you to charge the battery at room temperature range.

Batteries have life cycles. If the time that the battery powers equipment becomes much shorter than usual, the battery life is at an end. Replace the battery with a new battery of the same make and specification.

Do not discard the battery with household trash. Please dispose of used battery according to your local environmental laws and guidelines.

Use manufacturer approved batteries, chargers, accessories and supplies. K1 ROCK will not be held responsible for user's safety when using unapproved accessories or supplies.

Recycle Your Handset

The WEEE logo (shown at the left) appears on the product (battery, handset, and charger) to indicate that this product must not be disposed off or dumped with your other household wastes. You are liable to dispose of all your electronic or electrical waste equipment by relocating over to the specified collection point for recycling, of such

18

Specified collection points for recycling of such hazardous waste. Collection and proper recovery of your electronic waste equipments at the time of disposal will allow us to help preserve the environment. Recycling of the electronic waste equipment will ensure safety of human health and environment. For more information on best practices for disposal of electronic and electrical waste, please visit our web site:

www.micromaxinfo.com/weee.php.

Disclaimers

1. The colors and specifications shown/mentioned in the user manual may differ from the actual product. Images shown are for representation purpose only. Other product logos and company names mentioned herein may be trademarks or trade names of their respective owners.

2. K1 ROCK keeps the right to make modifications to any of the content in this user guide without public announcement in advance. The content of this manual may vary from the actual content displayed in the mobile phone. In such a case, the latter shall govern.

All rights reserved. Reproduction, transfer, distribution or storage of part or all of the contents in this document in any form without the prior written permission of K1 ROCK is strictly prohibited.

19

1.FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

SAR Information Statement

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S.

Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific

organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the

actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the

government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 0.782W/Kg and when worn on the body, as described in this user guide, is

0.296W/Kg(Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment

Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on

FCC ID:QRP-AZUMIAL2Z Additional information on Specific Absorption Rates (SAR) can be found on the

Cellular Telecommunications Industry Association (CTIA) web-site at <http://www.wow-com.com>. * In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 15mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
