

Description of Operation

EUT is a [USB Flash Wireless LAN Card](#) with 11 channels and 128/256/512MB flash. This device provided four kind of transmitting speed 1, 2, 5.5 and 11Mbps. The device of RF carrier is DQPSK,DBPSK and CCK. The device adapts direct sequence spread spectrum modulation. The antenna is Dipole Antenna, and there is [mini coaxial antenna connector](#).

This [USB Flash Wireless LAN Card](#) is an IEEE 802.11b Wireless LAN adapter. It allows your computer to connect to a wireless network and to share resources, such as files or printers without being bound to the network wires. Operation in 2.4GHz Direct Sequence Spread Spectrum (DSSS) radio transmission, the [USB Flash Wireless LAN Card](#) transfers data at speeds up to 64/128-bit Wired Equivalent Protection(WEP) algorithm is used. In addition, its standard compliance ensures that it can communicate with any 802.11b network.
