This report sets forth our findings solely with respect to the test samples identified herein. The results set forth in this report are not indicative or representative of the quality or characteristics of the lot from which a test sample was taken or any similar or identical product unless specifically and expressly noted. Our report includes all of the tests requested by you and the results thereof based upon the information that you provided to us. You have 60 days from date of issuance of this report to notify us of any material error or omission caused by our negligence, provided, however, that such notice shall be in writing and shall specifically address the issue you wish to raise. A failure to raise such issue within the prescribed time shall constitute your unqualified acceptance of the completeness of this report, the tests conducted and the correctness of the report contents. Unless specific mention, the uncertainty of measurement has been explicitly taken into account to declare the compliance or non-compliance to the specification. The report must not be used by the client to claim product certification, approval, or endorsement by A2LA or any government agencies.

1 Certificate of Conformity

Product: RF Large Coil Carrier Station

Brand: KLA SensArray

Test Model(s): SCLC300

Series Model No.: SCLC200/SCLC300

Sample Status: Product Validation

Applicant: KLA Corporation

Test Date: 04/06/2020

Standards: FCC Part 1 (Section 1.1307(b), 1.1310)

FCC Part 2 (Section 2.1091)

KDB 680106 D01 RF Exposure Wireless Charging App v03:

The above equipment has been tested by **Bureau Veritas Consumer Products Services, Inc., Milpitas Branch**, and found compliance with the requirement of the above standards. The test record, data evaluation & Equipment Under Test (EUT) configurations represented herein are true and accurate accounts of the measurements of the sample's EMC characteristics under the conditions specified in this report.

2 General Information

2.1 General Description of EUT

Product	RF Large Coil Storage Case
Brand	KLA SensArray
Test Model	SCLC300
Serial Number	SA20223
Series Model	SCLC300 SCLC200
Status of EUT	Product Validation
Power Supply Rating	4.5Vdc
Modulation Type	OOK
Operating Frequency	1.5MHz
Antenna Type	Loop PCB Antenna
Antenna Connector	N/A
Product Description	The EUT communicates with the SA Wafer to determine the charge state of the SA Wafer batteries through an RF induction interface and charges the SA Wafer batteries through that same RF induction circuit so they remain at the optimum charge level.

2.2 Wireless Power Transfer

2.3 Description of Support Units

The EUT has been tested as an independent unit together with other necessary accessories or support units. The following support units or accessories were used to form a representative test configuration during the tests.

300-1500			f/1500	30
1500-100000			1	30
f = frequency in MHz * = Plane-wave equivalent power density				

E and H-field measurements should be made with the center of the probe at a distance of 15 cm surrounding the device and 20 cm above the top surface of the primary/client pair.

KDB 680106 D01 RF Exposure Wireless Charging App v03:

- (1) Power transfer frequency is less than 1MHz
-----No, Power transfer frequency is 1.528MHz
- (2) Output power from each primary coil is less than or equal to 15 watts
-----Yes, power is 2W
- (3) The transfer system includes only single primary and secondary coils. This includes charging systems that may have multiple primary coils and clients that are able to detect and allow coupling only between individual pairs of coils.
-----Yes, Transmitter and receiver have only one coil each
- (4) Client device is placed directly in contact with the transmitter.
-----No, Distance between charger and receiver is 11mm max.
- (5) Mobile exposure conditions only (portable exposure conditions are not covered by this exclusion).
-----Yes, Mobile exposure condition only, product is used >20cm from user.
- (6) The aggregate H-field strengths at 15 cm surrounding the device and 20 cm above the top surface from all simultaneous transmitting coils are demonstrated to be less than 50% of the MPE limit.
-----Yes, 0.06 A/m < 0.815 A/m (50% of limit 1.63 A/m)

4 Test Point Description

Evaluation Method

The evaluation method first requires a determination of the antenna region(s) in which the exposure occurs, and from this determination the appropriate evaluation method (calculation or measurement) can then be used.

For each region there is a preferred (or “reference”) evaluation method and possible alternatives. When an alternative method is used it typically provides a more conservative evaluation of the RF hazard.

The region is determined, based on the minimum separation distance from the device antennas to persons and the size/gain of the antenna. The minimum separation distance is based on either a distance specified in the installation/user’s manual or on an evaluation of intended use.

Bureau Veritas is a global leader in testing, inspection, and certification (TIC) services. We help businesses improve safety, sustainability, and productivity; and our clients include most leading brands in retail, manufacturing, and other industries. With a presence in every major country around the world, our quality assurance and compliance solutions are vital in helping our customers enhance product quality and concept-to-consumer journeys. We also assist with increasing speed to market, profitability, and brand equity throughout the supply chain. Bureau Veritas is a leading wireless/IoT testing, inspection, audit, and certification provider, with a global network of test laboratories to support the IoT industry in areas of connectivity, security, interoperability as well as quality, health & safety, and environmental/chemical requirements.

Declaration of Model Differences Letter

Applicant: KLA SensArray
 Product name: RF Large Coil Storage Case
 Brand: KLA SensArray
 Model:

Model Name	Model Number
STORAGE CASE LC 300	SCLC300
STORAGE CASE LC 200	SCLC200

Please refer to model difference as below.

Circuit board layout, component models are exactly the same.

#	Product Characteristics:	Products are:	
		Same	Different
1	Radio Frequency Operating Range(s)	X	
2	RF Power / Field Strength	X	
3	Radio Frequency Circuitry	X	
4	Antenna Characteristics	X	
5	Associated Digital Circuitry	X	
6	Functional Capabilities	X	
7	Cosmetic/Dimension Differences		X
8	Case Design/Materials		X

For any differences, a description is provided in the table below.

#	Description of differences:
1	STORAGE CASE LC 300 is based on 300mm diameter plastic case, STORAGE CASE LC 200 is based on 300mm diameter plastic case with plastic adaptor.
2	STORAGE CASE LC 200 is a modified design based on STORAGE CASE LC 300 with adaptor design, the material is still plastic.

The difference between them impose no deviation in their RF aspect, and hence, there applies no change to RF test results
