## FCC STATEMENT

- a. Reference: This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) the device must accept any interference received, including interference that may cause undesired operation.
- b. Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user authority to operate the product.
- c. NOTE: This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This product generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the product does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try and correct the interference by one or more of the following measures:
- i. Reorient or relocate the receiving antenna.
  - ii. Increase the separation between the product and the receiver.
  - iii. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - iv. Consult the dealer or an experienced radio/TV technician for help.
- d. for Canada:
- i. This Class B digital apparatus complies with Canadian ICES-003.
  - ii. Cet appareil numérique de la classe B est conforme la norme NMB-003 du Canada.

## WARRANTY

Visit [www.caliberseries.com/advantagewarranty](http://www.caliberseries.com/advantagewarranty) for details on the Caliber Advantage Warranty.

## INTRODUCTION

Welcome to a new world of mobile gaming. The Caliber Advantage is like no other mobile controller on the market, and you are about to experience its game-changing performance. Read through the following instructions to learn how to get the most benefit from it, and then use your Advantage to play like you never played before.

**Note:** Visit [caliberseries.com/app](http://caliberseries.com/app) to download your free Caliber app that includes a list of compatible games.

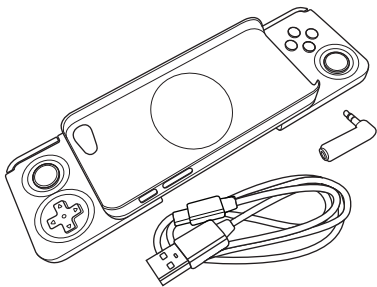

Read and follow these instructions to begin using your Advantage controller.

## MEET YOUR CALIBER ADVANTAGE

Your Caliber Advantage includes:  
Caliber Advantage Controller  
An iPhone 5 and iPod Touch 5th generation case

3.5mm adapter  
Micro USB cable  
Instruction manual

As you verify each piece, take a moment to familiarize yourself with its features.

## QUICK START

Get in the game quickly by following these five, simple steps. But even if you don't read them, just make sure to charge your Advantage completely before playing.

visit [www.caliberseries.com](http://www.caliberseries.com) for the app and a list of custom games.

## WARNINGS

In order to get the most from your Caliber Advantage make sure to take proper care of it.

Do not expose your controller or any of its parts to water.

Do not use your controller close to heat sources.

Do not place objects on your controller.

Avoid dropping your controller.

Keep out of reach of children.

## SPECIFICATIONS

- Battery: 240mAh rechargeable lithium
- Operates using RAM7 microprocessor
- Power will turn on and off automatically by inside magnetic induction sensor.
- Standby current consumes only .8mA offering three months of standby power.

## ADDITIONAL FEATURES

Your Advantage comes with the latest Bluetooth 4.0 technology. The controller uses the proprietary Caliber Engine Application for data transmission.

Our exclusive Caliber Engine Application supports custom developed games for a more genuine gaming experience. Download the Caliber App on iTunes or

1. Fully charge your Advantage controller (for more information see Charging).  
**Note:** Fully charging your controller typically takes up to 2 hours.

2. Snap your iPhone or iPod Touch into the controller case. Make sure your device camera and buttons align with their corresponding holes on the case (for more information see Attaching/Detaching Controllers).

3. Make sure your device Bluetooth connection is on (for more information see Pairing).

**Note:** The Advantage will pair automatically through compatible games. It will not show up in the list of available devices.

4. Slide both sides of your controller open to reveal the control pads. A blue LED light on the front will begin flashing indicating your Advantage is on. Simply

slide the control pads back to their original position to turn it off.

5. Use your iPhone or iPod Touch to launch compatible games, and begin enjoying the latest evolution in mobile gaming.

**Note:** When you launch a compatible game, the Advantage controller will pair automatically with your device. When pairing, the blue LED will remain solid for a few seconds, and then turn off. Depending on the game, it may take up to ten seconds to pair. If it does not pair, simply exit the game and repeat steps three through five.

## CONTROLLER

- A: Left/Right Shoulder Buttons
- B: Left/Right True Analog Joysticks
- C: A, B, X, Y Face Buttons
- D: D-Pad
- E: iPhone 5 Detachable Case
- F: Blue/Red LED Bluetooth/Battery Indicator
- G: Micro USB Charging Port

## OPERATIONAL FEATURES

True analog joysticks with extra sensitivity thanks to Bluetooth 4.0.

Shoulder buttons, D-Pad, and face buttons provide accurate control.

Exclusive Caliber Engine Application offers advanced, precise control in games.

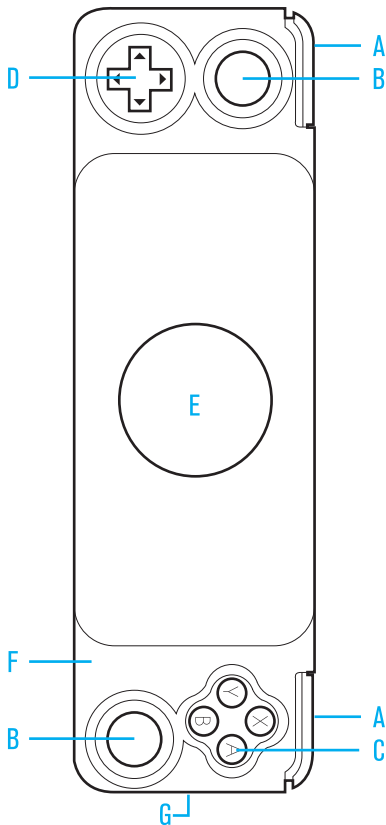

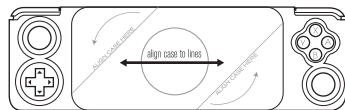

Play games in portrait and landscape view by turning iPhone 90 clockwise.

2 months of standby power and up to 17 hours of continuous play.

Turns on when opened and sleeps after 10 minutes of being inactive.

To reattach the controllers, simply line your device up with the guidelines labeled Align case here and press. While applying light pressure, twist the controllers counter-clockwise until your device is back in portrait or landscape mode. Game on.

**\*Note:** Never twist your device more than 135 degrees.

## POWERING ON/OFF

To begin using the Advantage to dominate all challengers, simply slide the left-and right-hand controllers out so they fit comfortably into your hands. A blue LED will flash, indicating you're powered up and ready to go. When fully charged, the Advantage can give you up to 17 hours of continued dominance. When you're ready to give your opponents a breather, simply slide the controllers back under the base and carry on.

ON

OFF

## TAKING PHOTOS

Sometimes the best way to celebrate is to snap a picture of your latest victory. To access your device camera, just give the Advantage a little clockwise twist to 90°, snap the picture, and move on to the next opponent.

## ATTACHING/DETACHING CONTROLLERS

The Advantage doubles as a protective case for your device, so you never need to remove it. However, if you want to remove the controllers simply close them and twist clockwise to 135 degrees\*. You should see lines indicating where to turn. When the controllers stop, pull them away from your device, and set them aside until your next gaming session.

\* Memory effect is when a battery forgets how much power it can hold if it is not completely depleted between charges. This makes it so the battery consistently holds less and less of a charge.

## CHARGING

To charge your Caliber Advantage, plug in the micro USB cable (included) and connect it to a power source. Let it power up for two hours to get a full charge, then you're good to go for up to 17 hours of uninterrupted playing. If you're in the middle of gaming when it needs a charge, the Advantage can continue playing even while it's charging. We know it may be hard, but we suggest letting it get a full charge before dropping the Advantage precision controls on your opponents.

## PAIRING

The Advantage is so advanced that it will pair to your iPhone or iPod automatically. All you have to do is make sure your device is ready for the action. Follow these steps to allow for automatic pairing.

1. Turn on your device Bluetooth connection by navigating to Settings > General > Bluetooth > On

**Note:** Because the Advantage pairs automatically, you will not see it listed as an available device.

2. Turn the Advantage on by sliding the controllers out.

3. Open a compatible game. The blue LED will light and then go out when the Advantage is paired and ready to go.

**Note:** Some games may take as long as 10 seconds to pair. If the game fails to pair, simply close the game,

check your battery level, and repeat steps 1 through 3.

4. Once paired, settle in and enjoy the biggest revolution in mobile gaming.

## LED FUNCTION

The LED has two functions: to indicate power/pairing (blue) and to indicate the Advantage remaining power supply (red). The LED uses the following to indicate the Advantage status:

- Blue Flashing: Power on and attempting to pair with your selected game.
- Blue Solid Then Off: Pairing successful and ready to play.
- Red Flashing: Low battery.
- Red Solid: Charging.

## BATTERY

Your Advantage comes equipped with a rechargeable lithium battery that can

keep you gaming for up to 17 hours of uninterrupted play. When you see the LED flashing red, just use the micro USB to connect to a power source and keep on gaming. When you're done playing, close your controllers, let your Advantage power up for a couple of hours, and it'll be ready to go whenever you are.

If you leave the Advantage open for ten minutes without playing, it will enter sleep mode to preserve battery life. To wake it, just slide your controllers closed and then open again.

The battery has no memory effect\*, and can be recharged whenever you wish. You can also continue playing with it connected to a power source. However, when you're not playing and wish to recharge, we suggest closing the controllers to help preserve battery life.
