RE: FCC ID: QTKRM-207\_ATCB005191  
Attention: Ole Soerensen

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the manual appears only to deal with M rating hearing aid compatibility. The device appears to have been tested for T-coil as well. Please explain.
2. Please note that the operational description does not address how the T-coil is activated or if activating the T-coil changes the audio response of the phone. Please verify that the audio response of the device is only affected by simple activation of the T-coil circuitry and that the user cannot otherwise control/change the audio response.
3. Please note that the M and T rating on the grant is one overall rating of the device. The reports list the individual M and T ratings for each band. Please provide a statement in the HAC reports that give a clear indication as to the overall M and T rating for the device. Alternately, please explain if it is desired to attempt to put each bands M and T combined rating separately on the grant. Please note it is not certain this is allowed for the overall M and T rating for the device.
4. Please provide the data for the probe modulation factor as determined using Annex C.3 of the ANSI C63.19 standard. This is usually done by tabular as well as plotted data. If I have missed this data in the reports please show the page or section numbers where it can be found.
5. Please note that the test report shows the communication tester for part 22 and 24. Please verify if the CMU200 is also fully functional to test Part 27 devices.
6. Please note that further information may be requested once the FCC has reviewed the part 27 PBA request for AWS devices under part 27.5(h).

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
