RE: FCC ID: QTLRH-60\_ATCB001547

Attention: Andrew White

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

FCC

1. Please note that while you have mentioned several files in the SAR report dealing with the calibration data, you have not provided those files for the application. Please provide the calibration data files for the dipole and probe used in the SAR validation and testing.

Industry Canada

2. Please note that the power level information on the RSP100 application form does not include the step value. Please note that the tuning procedure states that the power range is tunable in predefined step values. Please provide this information in the IC form. Please also check the step function on the IC application document.

3.

A handwritten signature in black ink that reads "Dennis Ward". The signature is written in a cursive style with a long, sweeping line for the last name.

Dennis Ward

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
