Power output listed is conducted. The maximum output power on a channel adjacent to any band edge must be reduced as specified within this application. This device is authorized for use with internal antennas only. The use of external antenna(s) requires the submission of a Class II permissive change application. In order to comply with the integral antenna requirement, any external antennas may not operate within the 5.15-5.25 GHz UNII Band. The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provided with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

CC: This device is certified pursuant to two different Part 15 rules sections.

CE: This device has shown compliance with the conducted emissions limits in 15.107, 15.207, or 18.307 adopted under FCC 02-157 (ET Docket 98-80). The device may be marketed after July 11, 2005, and is not affected by the 15.37(j) or 18.123 transition provisions.
