

Circuit Description

As a power line, 12V DC (ACC) can be used.

12V DC power is supplied via power cable to IC3 KA7805
And 5V DC power(A5V) is supplied to TICI after being boosted to 5V.
FM Modulator is enabled by FM Mode switch “ON” in the Main Unit.

TICI BH1415F, as a wireless Audio Link IC which is manufactured by
Rohm, can transmit FM-Stereo via ANT Cable to H/U,
If you add the frequency of 7.6MHz X-TAL Clock and O.S.C
Circuit to it(TICI BH1415F).
