Declaration of M3e Product SKUs

To whom it may concern:

This letter confirms the M3e product SKUs (namely M3E-S and M3E-X) are similar by

1) Electrical interfaces like DC Power, GND, I/O Lines are identical.
2) Form-factor, Size and External PIN Configurations are identical.
3) Both SKUs supports HF and LF RFID functionality and Operation
4) M3ES enables FW secure features and M3EX model disables secure features

M3E-S and M3E-X are electrically identical. The only difference between the two is whether the third-party HID SE Processor IC is populated or not. The HID SE Processor IC performs security key management. The M3E-S includes the HID SE Processor. The M3E-X does not include the HID SE Processor.

We request TCB to grant single FCC ID and IC ID for the M3E.

Authorized Signatory:

Harinath Reddy
