

TCB,

Enclosed is an application for a Class II Permissive Change to FCC ID: QV5MERCURY5E. The change being made is a part substitution of an amplifier. The part is pin for pin compatible, has the same basic function of the old part, and the attached report shows that the radio parameters have not changed. The part being replaced is the M/A-COM MAALSS0038. The new part is the Avago Technologies MGA-82563.

See attached:

Test Report
