To whom it may concern:

The enclosed documents constitute a formal submittal and application for a Class II Permissive change for a 900MHz RFID (FCC ID: QV5MERCURY5E) module pursuant to the following rules:

Subpart C of Part 15 of FCC Rules (CFR 47), Intentional Radiators

The permissive change application is to allow co-location of the module with a 2.4GHz Bluetooth radio module, FCC ID: T9JRN41-1 or FCC ID: T9J-RN42.

As neither module has been modified from the filings on record with the FCC, no testing was performed. An MPE exhibit has been provided to show compliance with the RF exposure requirements when both radios are operating. The MPE calculation was performed using the highest output power reported for the two Bluetooth modules.

Elliott Laboratories, as duly authorized agent prepared this submittal. A copy of the letter of our appointment as agent is included with the application.

If there are any questions or if further information is needed, please contact Elliott Laboratories for assistance.

Sincerely,

Mark Hill
Staff Engineer
