

Additional Model Number for FCC

Nov 4, 2019

<u>Re: Reguest for Additional Model Number for FCC</u>

ThingMagic would like to request the addition of another model number to the same FCC Grant. The new model number is M6E-M-A.

There is no hardware difference between the 2 model numbers. The only difference is in the number of UHF RFID tags that the device reads. The M6E-MICRO-A is limited to 50 tags per second, once this limit is reached no new tags are stored in the tag buffer. The M6E-M-A has no limitation on the number of tags that enters its tag buffer.

This limitation is implemented in software. There is no change in the configuration of the RF transmitter or receiver between the 2 models.

Sincerely,

Thomas H. Grant General Manager 617-682-3769 tgrant@thingmagic.com
