

Professional Installation Attestation

Date: 10/03/2019
 FCC ID: QV5MERCURY6E-MH
 IC ID: 5407A-MERCURY6EMH

JADAK declares the requirements are met for KDB 353028 D01 v01 for the above-mentioned product device IDs per the details below.

This device must be professionally installed.

c.ii) Professional Installation permits the use of the following antennas specified below. Refer to the User Manual for the following information:

1.1 Qualified Antennas

Antenna Type	Manufacturer	Manufacturer Part Number	Max. Linear Gain (dBiL)
Circular	MTI Wireless	MT-242043/TRH/A/K	6
Linear	Laird Technologies	S8964B	6

1.2. Qualified Cables and Adapters

Antenna Type	Manufacturer	Manufacturer Part Number	Loss at 915 MHz (dB)
LMR195 Length: 3.66 meters Loss: 0.36 dB/m	ThingMagic, a JADAK brand, a business unit of Novanta	CBL-P12	1.3
RF Coaxial Adapter SMA Plug, Male Pin to RP-TNC Jack, Male Pin	Amphenol RF Division	242124RP	0.1
RF Coaxial Adapter MMCX Plug, Male Pin to SMA Jack, Female Socket	Cinch Connectivity Solutions Johnson	134-1019-181	0.1

NOTE: Only similar antennas with the same or lower gain, and cables with/without additional adapters or connectors with total loss same as or higher than the total loss in Table 1.2. above can be used to connect to the M6e-Micro or M6e-M without violating FCC regulations. It is the responsibility of the professional installers to comply with this requirement.

c.iii.1) The device referred to in the above IDs is not sold through retail chains or public stores. It is only sold directly to known, qualified users or through Value Added Reseller Partners who are authorized installers or resellers.

c.iii.2) The device referred to in the above IDs is not sold via retail or to the general public. It is only sold to known, qualified users or through Value Added Reseller Partners who are authorized installers or resellers.

c.iii.3) The M6e-Micro-A/M6e-M-A is an embedded RFID module for Medical and Advanced Industrial devices. It is usually part of a larger medical or industrial system. It is not sold to the general public.

c.iii.4) The device referred to in the above IDs is an embedded RFID reader typically used as part of a larger Medical or Advanced Industrial System, such as medical supply cart or warehouse inventory tracking system. Operation of these larger systems requires specific equipment knowledge of configuration of multiple hardware points including RFID tags and RFID antennas. These require installation by an experienced or trained professional.

c.iv.1) Installation will be controlled by the known, qualified users or Value-Added Reseller Partners who have knowledge of installation requirements. Installation requirements include knowledge of RFID systems including hardware, software, and system integration. Hardware includes placement and orientation of antennas and RFID tags. Software includes operation of the software programming interface. System integration includes positioning, orientation, and distance of the various hardware components including antennas and tags.

c.iv.2) This product is only sold to known, qualified users or through Value Added Reseller Partners who are either trained professionals or hire knowledgeable, trained installers. It is not sold to the general public.

c.iv.3) Installation requires special training related to the software programming interface, knowledge of RFID antenna installation, connector cables with specialty connectors, and RFID tags.
