## Declaration of M7E Product Family Similarity

To whom it may concern:

This letter confirms the two models certified under FCC ID: QV5MERCURY7EP and IC ID: 5407A-MERCURY7EP are electrically equivalent.

The two Models are PMN: M7e-Pico (HVIN: SUB-10045) and PMN: M7e-Petite (HVIN: SUB-10041). M7e-Pico has the default maximum output power configured to 24dBm. M7e-Petite has the default maximum output power set to 27dBm. The default power on these modules is programmed at the factory. M7e-Pico and M7e-Petite are the same hardware and have the same firmware. The default maximum output power configuration for each model is configured via license keys not accessible to the user.

We request TCB to apply the test results to both of these two new products.

Authorized Signatory:
