### To Whom It May Concern:

We Dyson Technology Ltd declare that our Robotic Vacuum Cleaner operates under the definition of a DFS client device without radar detection.

The client software and associated drivers will not initiate any transmissions on DFS frequencies 5260 – 5320 MHz and 5500 – 5700 MHz without initiation by a master device. This includes restrictions on transmissions for beacons and support for ad-hoc peer to peer modes.

Yours sincerely,

Neil Taylor  
Senior Radio Approvals Engineer
