RE: FCC ID: QVVRH-67\_ATCB001707

Dear Mr. Ward

Regarding your comments for the Application I have here written the answers:

1. Yes, temporary confidentiality is being requested. The Confidential check boxes for those documents requested to be confidential were marked when uploading. However there could have been a misunderstanding in marking the Confidential and Short-Term Confidentiality check boxes.
2. The measurements and validation on 8/18/2004 were made using probe SN:1396 and SN:1429. By mistake the probe SN:1396 and DAE unit SN:388 were not written in the equipment list on page 5. This has been correct in a new version of the test report EXHIBIT\_11\_DTX12180-EN\_QVVRH-67.pdf which will be uploaded to the ATCB file server. So please disregard EXHIBIT\_11\_DTX11929-EN\_QVVRH-67.pdf.
3. A test report, EXHIBIT\_6\_DTX11991-EN\_QVVRH-67.pdf, containing test results for FCC 15.107,a, AC powerline conducted emissions and 15.109,a, Radiated emissions will also be uploaded at the same time.

We apologize for the delay in answering and hope that above is satisfactory to continue the application. In addition it will be very much appreciated if the application could be finished by Friday this week.

on behalf of Mr. Atsuo Taguchi

Yours sincerely

Ernest Mayer
