RE: FCC ID: QVVRM-153\_ATCB003591

Attention: Robert Binder

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the parts list is not listed on the request for confidentiality. Please note that this means the parts list will be public view. If the parts list as well as the tune up procedure is to be confidential, please provide another request for confidentiality including the parts list.
2. Please note that the 731 shows only GSM and BT and that the front end components of the WLAN and WCDMA have been left out of the RM-153. Please explain why the WLAN SAR data is in the SAR report (see pages 32-35 and 42 of the SAR report). If the WLAN is disabled then this data is of no use and needs to be removed as it is irrelevant to the application. If the WLAN is active in the device then the device may have to be certified by the FCC. Please explain and revise all documents in the application as necessary.
3. Please note that while it appears you have provided EU SAR information, you have not provided the required US/Canada SAR information in the manual. Please provide a revised manual with the appropriate US SAR information.
4. Please note that as this is also a part 15C device, certain part 15 statements are required to be in the manual. Please provide a manual containing the appropriate non-modification statement as specified in 15.21.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
