Operation Description:

Plug the receiver directly in any power socket, and use 23A, 12V Battery for remote sender. The LED (Power) on the receiver will light on when the power socket is available.

1. Remote Sender Control

Press the button ONE/TWO/THREE on the remote sender to turn ON/OFF the Receiver ONE/TWO/THREE. When the button is pressed, the LED on the Remote Sender will light on to indicate the radio signal is sent.

2. Manual Control

Press the ON/OFF key to turn on/off the power from the power socket. Or Press the OFF key to turn off it directly. The LED (ON) will light on when the power is turned on and LED (OFF) will light off. The LED (ON) will light off when the power is turned off and LED (OFF) will light on.

Notes:

- 1.To ensure the appliance power status, please operate Super Switch in eyesight range.
- 2.Only one Super Switch is allowed on one AC outlet.
- 3.60 cm distance minimum between each of two Super Switch is recommended.
- 4.Some appliance with EMI resource may affect the operation distance such as microwave oven in use.

Warning:

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.**
- Increase the separation between the equipment and receiver.**
- Connect the equipment into an outlet on a circuit different from that to which the receiver is needed.**
- Consult the dealer or an experienced radio/TV technician for help.**
