Subject: Test Rationale

Application for FCC ID: QWP-45700

Applicant: Cambium Networks Ltd

Dear Examiner,

In accordance with the requirements of Part 15.204 (c)(2) Cambium Networks confirm that the test program which was carried out employed the highest gain antenna of each type supported by the PTP 700.

In accordance with Part 15.204 (c)(3) the antenna types and gains used during the Part 15E UNII-2A and UNII-2C certification test are given in Table 1 below.

Antenna Type	Manufacturers Gain (dBi)	
	UNII-2A Band (5.25 – 5.35 GHz)	UNII-2C Band 5.47 – 5.725 GHz Band
4' Parabolic Dish	34.5	-
2' Parabolic Dish	-	28.5
Flat Plate	28.5	28.5
Sectorized	17.0	17.0
OMNI	13.0	13.0

**Table 1: Antenna Types and Gains tested for Certification**

Sincerely yours,

Donald W Reid
